HEALTH

Noticias 23 a las 10pm	3-Jan	10pm	3:50	News of Buffalo Bills player Damar Hamlin's collapse during a football game last night has revived the discussion of a heart ailment that can be deadly in both athletes and healthy people. Many were watching the game were shocked when the player fell out of nowhere and the medical team ran to the playing field to help him. He remains in critical condition. Cardiac arrest has several causes and any healthy person can suffer from it. It is the lack of electrical effectiveness of the heart to pump blood to the brain, kidneys, and other tissues. A strong blow to the chest just in the thousandths of seconds in which the heart is most vulnerable can be deadly. Fort Worth ISD reinforces that preparation before each game takes place where game administrators, paramedics, and trainers go over what to do in an emergency. In addition, in each game doctors and ambulances are present ready to act, the same security procedure that the NFL follows and that yesterday could have saved Hamlin's life.
