Length: 60  
Format: Interview/Discussion/Review;

Recent studies indicate that more than 70 percent of youth between the ages of 10 and 17 gambled in the past year, up from 45 percent in 1988. Almost one in three high school students gamble on a regular basis, according to the National Academy of Sciences. Lee Hochberg of Oregon Public Broadcasting reports on the rising number of teenage gambling addicts.

Series Title: American Experience  
Episode Title: AN AMERICAN CRUSADE  
Air Date: 1/2/2006 8:00:00 & 9:23 PM/502  
Length: 150

When Ronald Reagan's first term reached its halfway point, he was challenged with tremendous economic strife, the recession and unemployment had battered Reaganomics. As the Pentagon spent \$34 million per hour on building up U.S. military forces and nuclear weapons, the deficit increased. However, an economic transformation in 1983 and the slow return of Americans to work secured a second term for Reagan -- a term that would afford him his greatest triumphs and his most difficult blows. "The American Experience" chronicles Reagan's last four years in office -- from the loss of his closest advisors and the Iran-Contra scandal, to the dawning of the fall of Communism in Europe.

Air Date: 1/2/2006 6:00:00 PM/502  
Segment: 00:12:12

The recent furor over President Bush's domestic intelligence program is the latest skirmish in a centuries-old battle over presidential powers in times of war. By letting government agents eavesdrop without court oversight, Mr. Bush joined a long list of presidents who've tested the limits of their war-time authority. For a historical look at how executive powers have been wielded and its impact on governance, we're joined by Richard Norton Smith, director of the Abraham Lincoln Presidential Library and Museum in Springfield, Ill.; Ellen Fitzpatrick, a professor of history at the University of New Hampshire; and Andrew Rudalevige, professor of political science at Dickinson College and author of "The New Imperial Presidency: Renewing Presidential Power after Watergate".

Program Title: Is Wal-Mart Good for America?

Air Date: 1/3/2006 8:00:00 PM/502

Air Date: 1/16/2006 4:00 AM

Segment: 00:51:56

FRONTLINE offers two starkly contrasting images: one of empty storefronts in Circleville, Ohio, where the local TV manufacturing plant has closed down; the other, a sea of high rises in the South China boomtown of Shenzhen. The connection between American job losses and soaring Chinese exports? Wal-Mart. For Wal-Mart, China has become the cheapest, most reliable production platform in the world, the source of up to \$25 billion in annual imports that help the company deliver everyday low prices to 100 million customers a week. But while some economists credit Wal-Mart's single-minded focus on low costs with helping contain U.S. inflation, others charge that the company is the main force driving the massive overseas shift to China in the production of American consumer goods, resulting in hundreds of thousands of lost jobs and a lower standard of living here at home.

Air Date: 1/15/2006 12:00 AM

The news out of Washington this week was centered on Capitol Hill even though Congress was out of session. It was a political bombshell that fell with the announcement that in the wake of the developments surrounding lobbyist Jack Abramoff, Republican Tom DeLay would not try to reassert himself as Majority Leader in the House of Representatives. This has set off a fierce scramble to fill not only that position but also for Republicans to take up the issue of lobbying reform. Time Magazine Political Correspondent Karen Tumulty updates the GOP political leadership battle while Washington Post Feature Writer and Columnist Jeffrey Birnbaum has the latest on how Republican leaders are hoping to turn the issue of reform in their favor.

Program Title: Is Wal-Mart Good for America?

Air Date: 1/3/2006 8:00:00 PM/502

Air Date: 1/16/2006 4:00 AM

Segment: 00:51:56

FRONTLINE offers two starkly contrasting images: one of empty storefronts in Circleville, Ohio, where the local TV manufacturing plant has closed down; the other, a sea of high rises in the South China boomtown of Shenzhen. The connection between American job losses and soaring Chinese exports? Wal-Mart. For Wal-Mart, China has become the cheapest, most reliable production platform in the world, the source of up to \$25 billion in annual imports that help the company deliver everyday low prices to 100 million customers a week. But while some economists credit Wal-Mart's single-minded focus on low costs with helping contain U.S. inflation, others charge that the company is the main force driving the massive overseas shift to China in the production of American consumer goods, resulting in hundreds of thousands of lost jobs and a lower standard of living here at home.

It is a visual wonderland, where imposing mountains rise almost two vertical miles above sprawling salt flats and canyons are painted in strokes of blue, pink, violet, and green from sunrise to sunset. This is Death Valley - one of the most inhospitable places on the planet. Nowhere else is a landscape so exquisite yet brutal, stunning yet harsh. Here, temperatures spike into the 130s, the earth cracks like broken clay, and when the hot wind blows, all you can taste is dust and salt. But, ironically, it is water that has shaped this super-arid home of true survivors.

Two recent news stories have raised questions about how the media operate. In one story, the media prematurely announced that 12 of 13 workers trapped in a West Virginia coal mine were alive, but officials later confirmed only one had survived. In another development, The New York Times' public editor criticized the paper for moving too slowly with a story on domestic spying by the National Security Agency. Jeffrey Brown discusses the treatment of these stories with Alex Jones, director of the Shorenstein Center on the Press, Politics and Public Policy at Harvard University, and Rachel Smolkin, managing editor of the American Journalism Review.

Length: 150

When Ronald Reagan's first term reached its halfway point, he was challenged with tremendous economic strife, the recession and unemployment had battered Reaganomics. As the Pentagon spent \$34 million per hour on building up U.S. military forces and nuclear weapons, the deficit increased. However, an economic transformation in 1983 and the slow return of Americans to work secured a second term for Reagan -- a term that would afford him his greatest triumphs and his most difficult blows. "The American Experience" chronicles Reagan's last four years in-office -- from the loss of his closest advisors and the Iran-Contra scandal, to the dawning of the fall of Communism in Europe.

The recent furor over President Bush's domestic intelligence program is the latest skirmish in a centuries-old battle over presidential powers in times of war. By letting government agents eavesdrop without court oversight, Mr. Bush joined a long list of presidents who've tested the limits of their war-time authority. For a historical look at how executive powers have been wielded and its impact on governance, we're joined by Richard Norton Smith, director of the Abraham Lincoln Presidential Library and Museum in Springfield, Ill.; Ellen Fitzpatrick, a professor of history at the University of New Hampshire; and Andrew Rudalevige, professor of political science at Dickinson College and author of "The New Imperial Presidency: Renewing Presidential Power after Watergate".

The news out of Washington this week was centered on Capitol Hill even though Congress was out of session. It was a political bombshell that fell with the announcement that in the wake of the developments surrounding lobbyist Jack Abramoff, Republican Tom DeLay would not try to reassert himself as Majority Leader in the House of Representatives. This has set off a fierce scramble to fill not only that position but also for Republicans to take up the issue of lobbying reform. Time Magazine Political Correspondent Karen Tumulty updates the GOP political leadership battle while Washington Post Feature Writer and Columnist Jeffrey Birnbaum has the latest on how Republican leaders are hoping to turn the issue of reform in their favor.

Episode Title: Go Forth: From Creation to Abraham  
Air Date: 1/4/2006 7:00:00 PM/502  
Length: 60

Author Bruce Feiler brings his award winning book to life as he takes an archeological odyssey to visit the inscrutable desert landscape where the world's greatest religions were born. The three-part series takes viewers to some of the Bible's most inspiring places -- from the heights of Mount Ararat, where according to the Bible Noah's ark landed; to the desert in Turkey, where Abraham first heard the words of God and to the summit of Mt. Sinai, where Moses received the Ten Commandments. Combing breathtaking images, sweeping landscapes and intimate snapshots, the documentary puts a visual face on the stories that continue to inspire the human spirit. The first episode, "Go Forth: From Creation to Abraham," focuses on initial problems entering hostile areas in the Middle East, meeting Avner Goren -- a leading biblical archaeologist who becomes his traveling partner -- and the forbidding and dangerous environment of the Mesopotamian highlands, where civilization was born.

Episode Title: A Coat of Many Colors: The Israelites in Egypt  
Air Date: 1/11/2006 7:00:00 PM/502  
Length: 60

Egypt. Land of the Pharaohs--and of the Bible. Bruce Feiler continues his journey through the greatest stories ever told, by retracing Joseph's path to Egypt after his brothers sell him into bondage. When Joseph interprets the Pharaoh's dreams, he rises from slave to the heights of power and even brings his brothers and father Jacob to live in Egypt. Feiler takes us from the great temple of Karnak in Luxor, formerly ancient Thebes, to the pyramids and sphinx of Giza, and descends into the royal burial tombs in the Valley of the Kings. As he treks by camel, boat, horseback and even pyramid-climbing, he discovers how the ancient Egyptian culture and religion influenced the Israelites during their centuries-long stay in Egypt, especially in the importance placed on dreams and story-telling. Feiler explores the ancient ruins of cities where the Israelites were said to toil under an oppressive pharaoh. Beginning at the shallow waters of the Nile, Feiler retraces the story of one of the Bible's greatest figures, Moses, and his eventual confrontation with Pharaoh to let his people go. Did the Israelites build the pyramids? What could have caused the ten plagues? Was it really the Red Sea Moses crossed? As Feiler confronts these questions, on the very body of water that could have been where the waters were parted, he realizes that it isn't the location, or even the event that's important, but that it was experienced as an act of God.

It is a tantalizing idea and an outrageous long-shot: a shriveled mummy with crossed arms that has lain neglected on a dusty museum shelf at Niagara Falls could be the remains of a long-lost Egyptian king. While a trail of clues hints at how the looted mummy made its way to North America, archeologists, scientists, and even an orthodontist look to the latest genetic testing and imaging techniques in hopes of ascertaining the body's hidden identity. "The Mummy Who Would Be King" reveals an astounding story filled with historical intrigue and the wonders of forensic science.

RAISING CAIN, hosted by child psychologist Michael Thompson, Ph.D., co-author of the best-selling book Raising Cain, explores the emotional development of boys in America today. Thompson consults with some of America's most respected psychologists, social activists, researchers and educators to probe the issues facing young males. The documentary provides surprising new research about boys' inner workings, dispelling a number of commonly held misconceptions and highlighting innovative programs that are bringing out the best in America's boys.

Drama

John Adams was brilliant, argumentative, sometimes irascible. Abigail Adams was a savvy observer of the tumultuous political scene, not afraid to speak her mind in an age when women were excluded from politics. Together they forged one of the greatest partnerships in American history. In the tradition of its award-winning Presidents series, American Experience's John & Abigail Adams chronicles both an inspiring political marriage and the birth of a nation. Under the direction of Peter Jones (Bataan Rescue, The Great Transatlantic Cable), two formidable actors -- Simon Russell Beale (John Adams), recipient of the 2003 Laurence Olivier Theatre Best Actor Award for his performance in "Uncle Vanya," and Linda Emond (Abigail Adams), an accomplished stage actress who previously portrayed Abigail in the Broadway rendition of "1776" -- bring the couple to life. Historians, including David McCullough, author of the bestselling John Adams and the recent 1776, Joanne Freeman, and Joseph Ellis, provide insight on the couple and their legacy. A visionary and gifted political thinker, Adams moved a reluctant colonial Congress to declare independence from England, and single-handedly secured millions of dollars in loans to keep the American army from collapse. He penned the Massachusetts constitution, which served as the basis for the U.S. Constitution. He was the nation's first ambassador to England, its first vice president, and its second president. Through it all, Abigail remained his most trusted political advisor and confidante.

Length: 60

One journalist described it as a chance "to see justice catch up with evil." On November 20, 1945, the twenty-two surviving representatives of the Nazi elite stood before an international military tribunal at the Palace of Justice in Nuremberg, Germany; they were charged with the systematic murder of millions of people. The ensuing trial pitted US Chief Prosecutor and Supreme Court Judge Robert Jackson against Hermann Goering, the former head of the Nazi air force whom Hitler had once named to be his successor. Jackson hoped that the trial would make a statement that crimes against humanity would never again go unpunished. Proving the guilt of the defendants, however, was more difficult than Jackson anticipated. This AMERICAN EXPERIENCE production draws upon rare archival material and eyewitness accounts to recreate the dramatic tribunal that defines trial procedure for state criminals to this day.

Episode Title: A Country Between  
Air Date: 1/18/2006 8:00:00 & 11:00 PM DT2A  
Format: Documentary

As the Declaration of Independence is read to the Continental Army on the eve of the Revolutionary War, General George Washington thinks back to his first military experiences more than 20 years before when he was a young officer, fighting for the Crown to secure the western territories of Pennsylvania and beyond for colonial expansion. Washington was a pivotal figure in the start of the French and Indian War in 1754, a conflict that pitted England's goals for empire in the New World against French interests. Caught between were the Indian nations, whose leaders struggled to negotiate between these two European forces to protect their own interests. After a disastrous skirmish that leaves a French diplomatic envoy dead and a resounding defeat in his first full-scale battle at Fort Necessity, Washington becomes an aide to General Edward Braddock, who was sent from England with a large force to secure the strategic Forks of the Ohio. By equal measures arrogant and inexperienced, Braddock is met with bitter defeat by French forces and their Indian allies and succumbs to his battlefield wounds. Britain becomes more determined to win the war and sends thousands of troops, setting the stage for the next phase of the war.

Program Title: Private Warriors

Air Date: 1/17/2006 8:00:00 PM/502

Length: 60

FRONTLINE returns to Iraq, this time to embed with Halliburton/KBR, and to take a hard look at private contractors, including Blackwater, Aegis, Erinyes and Custer Battles, who play an increasingly critical role in running U.S. military supply lines, providing armed protection and operating U.S. military bases. These private warriors are targeted by insurgents and in turn have been criticized for their rough treatment of Iraqi civilians. Their dramatic story illuminates the Pentagon's new reliance on corporate outsourcing and raises tough questions about where they fit in the chain of command and the price we are paying for their role in the war.

NOLA Code: IMIX 000701C1  
Program Title: The Way We See It: What Makes a Teacher Worth Listening To?  
Air Date: 1/19/2006 3:00 AM  
Format: Interview/Discussion/Review; Other

Series Title: In the Mix  
Distributor: PLUS  
Length: 30

What makes a teacher worth listening to? This In the Mix special features diverse teens who describe how educators have had a positive impact on their attitudes, academics, and even behavior. It also highlights the creative ways in which some teachers are making education fun and relevant to their students, and their efforts to make even the most difficult subjects accessible to their teen audience. Segments include: a dance teacher who shows her students how to express their emotions through dance and teaches them the discipline they will need to be successful; a physics teacher who uses hands-on demonstrations and occurrences from everyday life to illustrate the principles of physics; a French teacher who imparts his passion for knowledge to his students; a group of poetry teachers who use unconventional methods to get their apathetic students involved; and a school for at-risk students who have returned after dropping out, which fosters a family environment to support and encourage its challenged students.

Program Title: Private Warriors

Air Date: 1/17/2006 8:00:00 PM/502

Length: 60

FRONTLINE returns to Iraq, this time to embed with Halliburton/KBR, and to take a hard look at private contractors, including Blackwater, Aegis, Erinys and Custer Battles, who play an increasingly critical role in running U.S. military supply lines, providing armed protection and operating U.S. military bases. These private warriors are targeted by insurgents and in turn have been criticized for their rough treatment of Iraqi civilians. Their dramatic story illuminates the Pentagon's new reliance on corporate outsourcing and raises tough questions about where they fit in the chain of command and the price we are paying for their role in the war.

The Sinai Desert. In the concluding chapter of "Walking the Bible," Bruce Feiler follows the Israelite's 40 year trek through what the Bible calls a "great and terrible wilderness." Feiler experiences the stark reality of the Sinai desert where it's a struggle simply to survive. He finds the locations said to be where God provided water and food for the Israelites - and discovers the secret of the tamarisk tree, which secretes a sweet, honey-like substance called "manna." In the shadow of the mountain believed to be the Biblical Mount Sinai, Feiler visits St. Catherine's Monastery, the oldest operating church in the world. He attends the services, a powerful, unchanged ritual of 1,500 years, and sees what's claimed to be the real "burning bush" in which God spoke to Moses. One of the monks, Texas-born Father Justin, shows him the Monastery's world-renowned library of priceless religious art and manuscripts. Later, when Feiler climbs Mt. Sinai where Moses is said to have received the Ten Commandments, he is struck by the spiritual significance of the land, and its relationship to the people, and to God. As he follows the 40 year route of the Israelites, he visits a local Bedouin family who also derive sustenance from the desert and travels to the "lost city" of Petra in Jordan, where the Israelites may have lived for many years. Nearing the end of Moses' journey, Feiler climbs Mt. Nebo, where God shows Moses the Promised Land the Israelites are about to enter. At the end of his own journey, Feiler realizes that although Moses is denied entrance himself, it is not the land after all that is important for Moses. It is his meeting with God.

Air Date: 1/24/2006 7:00:00 PM/502  
Length: 60

The trebuchet, a missile thrower invented in China more than 2,000 years ago, played a central role in siege warfare in Asia, the Middle East and Europe. Yet surprisingly little is known about how the various forms of this ancient weapon were built. The last remaining example from medieval times as dismantled for firewood a century ago, and the surviving descriptions and drawings are fragmentary and ambiguous. In this program, two teams made up of timber framers, engineers, military historians and experts on siege weapons attempt to build a trebuchet capable of the prodigious feats claimed for the medieval engines of war. Along the shores of Scotland's Loch Ness, at Urquhart Castle, the episode explores how the evolution of siege weapons influenced castle design and paints a vivid picture of life under siege in the time of Edward I.

-Episode Title: ROMAN BATH  
Air Date: 1/31/2006 7:00:00 PM/502  
Format: Documentary; Other

Many of the engineering principles and building techniques that underlay the great public works of the Roman Empire - thousands of miles of stone-paved highways, huge bridges that used the arch (a Roman invention) to span deep ravines and aqueducts that delivered fresh water to city centers from hundreds of miles away -- were first tested in a structure for which Rome's engineers are remembered today: the Roman bath. In its vaulted ceiling, its use of the revolutionary new building material now called concrete, and its remarkably intricate systems for plumbing and heating, each bathhouse embodied in microcosm the Romans' engineering genius. Still, despite the cultural and architectural importance of the Roman bath, many of its workings are still poorly understood. What mixture of sand, lime, water and rubble did the builders use to make their watertight concrete? How did they design and cast the domes and vaulted ceilings that allowed them to create large, open interior spaces? And how did they create the intricate plumbing and heating systems responsible for the baths' legendary comfort?

Air Date: 1/30/2006 8:00:00 PM/502

Length: 60

One journalist described it as a chance "to see justice catch up with evil." On November 20, 1945, the twenty-two surviving representatives of the Nazi elite stood before an international military tribunal at the Palace of Justice in Nuremberg, Germany; they were charged with the systematic murder of millions of people. The ensuing trial pitted US Chief Prosecutor and Supreme Court Judge Robert Jackson against Hermann Goering, the former head of the Nazi air force whom Hitler had once named to be his successor. Jackson hoped that the trial would make a statement that crimes against humanity would never again go unpunished. Proving the guilt of the defendants, however, was more difficult than Jackson anticipated. This AMERICAN EXPERIENCE production draws upon rare archival material and eyewitness accounts to recreate the dramatic tribunal that defines trial procedure for state criminals to this day.

On March 11, 2004, as four early morning commuter trains were arriving at 0020Atocha station in Madrid, a series of bombs were detonated. Packed with commuters and students heading for work and school, the trains were blown apart. Pandemonium ensued. Fractured bodies littered the station and railway tracks, leaving 191 people dead and more than 1,400 injured. It was the worst terrorist attack in the history of Western Europe. And it was a grim reminder that the followers of Al Qaeda were very much alive and well. In "Al Qaeda's New Front," FRONTLINE, in association with the Canadian Broadcasting Corporation and The New York Times, investigates the alarming threat radical Salafist jihadists pose to Western Europe and its allies-including the United States. Home to an estimated 18 million Muslims, Western Europe has become the new and deadly battleground in the war on terror.

FRONTLINE returns to Iraq, this time to embed with Halliburton/KBR, and to take a hard look at private contractors, including Blackwater, Aegis, Erinys and Custer Battles, who play an increasingly critical role in running U.S. military supply lines, providing armed protection and operating U.S. military bases. These private warriors are targeted by insurgents and in turn have been criticized for their rough treatment of Iraqi civilians. Their dramatic story illuminates the Pentagon's new reliance on corporate outsourcing and raises tough questions about where they fit in the chain of command and the price we are paying for their role in the war.

Series Title: The War That Made America  
Distributor: PBS  
Length: 120

As the Declaration of Independence is read to the Continental Army on the eve of the Revolutionary War, General George Washington thinks back to his first military experiences more than 20 years before when he was a young officer, fighting for the Crown to secure the western territories of Pennsylvania and beyond for colonial expansion. Washington was a pivotal figure in the start of the French and Indian War in 1754, a conflict that pitted England's goals for empire in the New World against French interests. Caught between were the Indian nations, whose leaders struggled to negotiate between these two European forces to protect their own interests. After a disastrous skirmish that leaves a French diplomatic envoy dead and a resounding defeat in his first full-scale battle at Fort Necessity, Washington becomes an aide to General Edward Braddock, who was sent from England with a large force to secure the strategic Forks of the Ohio. By

equal measures arrogant and inexperienced, Braddock is met with bitter defeat by French forces and their Indian allies and succumbs to his battlefield wounds. Britain becomes more determined to win the war and sends thousands of troops, setting the stage for the next phase of the war.

Series Title: The War That Made America  
Distributor: PBS  
Length: 120

The War That Made America brings to television a vastly important but often misunderstood period of American history - a period that set in motion forces that would culminate in the American Revolution. The four-hour dramatic documentary tells the story of the French and Indian War (1754-1763), which began in the wilderness of the Pennsylvania frontier and spread throughout the colonies and into Canada.

Air Date: 1/19/2006 3:00 AM  
Format: Interview/Discussion/Review; Other

Series Title: In the Mix  
Distributor: PLUS  
Length: 30

What makes a teacher worth listening to? This In the Mix special features diverse teens who describe how educators have had a positive impact on their attitudes, academics, and even behavior. It also highlights the creative ways in which some teachers are making education fun and relevant to their students, and their efforts to make even the most difficult subjects accessible to their teen audience. Segments include: a dance teacher who shows her students how to express their emotions through dance and teaches them the discipline they will need to be successful; a physics teacher who uses hands-on demonstrations and occurrences from everyday life to illustrate the principles of physics; a French teacher who imparts his passion for knowledge to his students; a group of poetry teachers who use unconventional methods to get their apathetic students involved; and a school for at-risk students who have returned after dropping out, which fosters a family environment to support and encourage its challenged students.
