KZQX QUARTERLY LIST OF PROGRAMMING PROVIDING THE MOST SIGNIFICANT TREATMENT OF COMMUNITY ISSUES

January 1 – March 31, 2020 **Filed 4-06-2020**

The following issues were identified as significant and addressed by KZQX in order to serve the community and act in the public interest as set forth by the Federal Communications Commission:

- 1. Drug and Alcohol Abuse including information about dangerous drugs and addiction
- 2. Crime including crime prevention, investigation and apprehension of offenders
- 3. Education including education standards, school safety, efforts to keep up with growth in the area and budget changes.
- 4. Religion including impact on daily living and inspirational stories
- 5. Business including local business issues, job opportunities, personal finance issues and the state of the economy.
- 6. Health and Medical including health education and awareness
- 7. Government including federal policies and local issues and candidates for office
- 8. Weather including weather education and warnings

The above issues and concerns were addressed in the following local, syndicated and network programming:

Corona Virus: Since mid March, when the Covid-19 virus attacked the USA, we have broadcast significant coverage of its spread, aired numerous Public Service announcements about precautions that everyone should take, how to support local businesses who are affected by the "Shelter in Place" declarations, and other pertinent information. We have broadcast lists of schools, colleges and businesses that are closed, events that are cancelled and lists of businesses deemed "essential services." We have established a call in "Good News Line" where the public can call in, leave a message about closures, event postponements, new operating hours, drive-up window locations or whatever they wish. These messages are put in a rotation that plays several times during the day. There is no charge for this service. We do reserve the right to edit these comments for content or time allocations. So far, every caller has been very cooperative.

Weather is always a primary concern in East Texas. With recent severe storms hitting Longview, Kilgore, and Henderson, it has been especially important. KZQX broadcasts a weather report Monday through Friday on the half hour, starting at 5:30 AM and ending at 6:30 PM. During weather emergencies we continue the coverage on weekends or whenever conditions dictate. Of course we also relay EAS weather alerts from the National Weather Service as they become available. A complete listing of those alerts and warnings can be found in our official EAS Log for 2020.

The Mayo Clinic Radio Health Minute: produced by the Mayo Clinic, runs weekdays on KZQX. This program contains timely medical information that is of concern to the East Texas area. Broadcast time is 11:30 A.M. Monday through Friday.

Michelle Mazurek, PhD, Assistant Professor, Computer Science, University of Maryland College Park

Nearly everyone today struggles with a myriad of passwords for their online activities. Professor Mazurek was involved in research at Carnegie Mellon University that found that long passphrases are more effective and easier to remember than an incomprehensible string of letters, numbers and special characters.

Parenting

Andrew Scott, Professor of Economics at the London Business School, Fellow at All Souls College, Oxford University and the Centre for Economic Policy Research, co-author of "*The 100-Year Life: Living and Working in an Age of Longevity*"

Many Americans have been raised on the traditional notion of a three-stage approach to life: education, followed by work and then retirement. However, Prof. Scott said this well-established pathway is already beginning to collapse: life expectancy is rising, pensions are vanishing, and increasing numbers of people are juggling multiple careers. He offered suggestions for how to better plan for a productive, longer life and retirement in today's rapidly-evolving economy.

Anna S. Mueller, PhD, Sociologist and Assistant Professor in Comparative Human Development, Research Associate at the Population Research Center at the University of Chicago

Teen suicide clusters are a recent discovery, and little is understood about their causes and how to prevent them. Prof. Mueller studied the phenomenon in a small town. She found that intense pressure to succeed academically and athletically, plus the ease with which private information became public, due to social connectedness, left teens and their parents unwilling to seek help for mental health problems. She said suicide prevention strategies need to be tailored to fit the unique dynamics of individual communities.
