Episode Title: Polar Extremes
Length: 120 minutes
Airdate: 2/5/2020 8:00:00 PM
Service: PBS
Format: Other

Join renowned paleontologist Kirk Johnson on an epic adventure through time at the polar extremes of our planet. Following a trail of strange fossils found in all the wrong places-beech trees in Antarctica, hippo-like mammals in the Arctic-Johnson uncovers the bizarre history of the poles, from miles-high ice sheets to warm polar forests teeming with life. What caused such dramatic changes at the ends of the Earth? And what controls the dial on Earth's thermostat? Today, the Arctic is warming faster than anywhere else in the world, and Antarctica has locked in its ice enough water to raise sea level by a terrifying 200 feet. The way that the poles respond to a warming climate is one of the greatest wildcards in predicting our climate future. Johnson uses Earth's history, written in stone, as a cipher to decode what is going on at our polar extremes today, and what the future may hold.

Series Title: NOVA #3810
Episode Title: Japan's Killer Quake
Length: 60 minutes
Airdate: 3/18/2020 9:00:00 PM
Service: PBS
Format: Documentary

In its worst crisis since World War II, Japan faces disaster on an epic scale: a rising death toll in the tens of thousands, massive destruction of homes and businesses, shortages of water and power, and the specter of nuclear meltdown at three reactors. The facts and figures are astonishing. The March 11th earthquake was the world's fourth largest earthquake since record keeping began in 1900 and the worst ever to shake Japan. The seismic shock wave released over 4,000 times the energy of the largest nuclear test ever conducted; it shifted the earth's axis by six inches and shortened the day by a few millionths of a second. The tsunami slammed Japan's coast with 30 feet-high waves that traveled six miles inland, obliterating entire towns in a matter of minutes. JAPAN'S KILLER QUAKE combines authoritative on-the-spot reporting, personal stories of tragedy and survival, compelling eyewitness videos, explanatory graphics and exclusive helicopter footage for a unique look at the science behind the catastrophe.

ALWAYS IN SEASON explores the lingering impact of more than a century of lynching African Americans and connects this form of historic racial terrorism to racial violence today. The film centers on the case of Lennon Lacy, an African American teen who was found hanging from a swing set in Bladenboro, North Carolina, on August 29, 2014. Despite inconsistencies in the case, local officials quickly ruled Lennon's death a suicide, but his mother, Claudia, believes Lennon was lynched. Claudia moves from paralyzing grief to leading the fight for justice for her son. As the film unfolds, Lennon's case, and the suspicions surrounding it, intersect with stories of other communities seeking justice and reconciliation. A few hundred miles away in Monroe, Georgia, a diverse group of reenactors, including the adult daughter of a former Ku Klux Klan leader, annually dramatize a 1946 quadruple lynching to ensure the victims are never forgotten and encourage the community to come forward with information that might bring the perpetrators to justice. As the terrorism of the past bleeds into the present, the film asks: what will it take for Americans to begin building a national movement for racial justice and reconciliation
