Alzheimer's Awareness/The Ad Council	30	8/22/202 3	8/15/20 25	3009, 3033	Hispanics are 50% more likely than non-Hispanic Whites to develop Alzheimer's disease. Additionally, there is evidence that missed or delayed diagnoses are more common among older Black & Hispanic adults than among older white adults. The small changes in a loved one can be mistaken for normal aging, making them wait to act and delay benefiting from early diagnosis. Some things come with age, some things don't. Run these PSAs to encourage families to notice the early signs of Alzheimer's and the importance of early detection for their loved ones.
Dacoda Instruments	30	8/31/202 3	9/19/20 23	3034	Born to be mild but a night to be wild. Women Behaving Badly features interesting women from around the region who definately color outside the lines. Encouraging listeners to be aware of the symptoms and health disparities of these life-threatening diseases by sharing pre-recorded 15-, 30-, and 60-second public service announcements (PSA) on prostate cancer and ovarian cancer awareness.
National Federation of the Blind (NFB)	30	9/11/2023	N/A	3042, 3049	The National Federation of the Blind, the transformative membership organization of blind Americans, illustrates in these psas that most people whose eyesight is changing due to aging or other health factors can benefit from solutions that blind people have found through our lived experience, but these individuals do not consider themselves blind and simply don't reach out for help. This is because blindness still carries stigma and is viewed as a tragedy by the general public. These new PSAs present an upbeat, positive image of blind and low-vision people. They encourage those with changing

					eyesight to reach out to the National Federation of the Blind to learn how they can continue to work, parent, and more by gaining support and learning from others who have been where they are.
