Station Call Letters: KVTA

1st Quarter February 2021

Prepared By: Tom Spence

<p>Program Name/Segment - Viewpoints</p>	<p>Date: 02062021</p>	<p>Program Format/Content Description: Each year, thousands of young adults are sent to long-term, in-patient behavioral centers that are seen as the last resort for troubled teens. Their parents often sign off on this treatment because they believe that this ‘tough love’ route is the only answer to turning things around.</p>
<p>Issue Addressed: Mental Health, Behavioral Treatment, Parenting, Psychotherapy, Psychology History, Innovation, Criminal Justice, Criminal Science, Forensic Science, Law</p>	<p>Time: 6:30a</p> <p>Duration: 30 min</p>	

<p>Program Name/Segment - Viewpoints</p>	<p>Date:</p>	<p>Program Format/Content Description: The Jupiter moon, Europa is 390 million miles away from Earth. In 2025, the NASA Europa Clipper mission launches and is estimated to arrive in Jupiter’s orbit by</p>

<p>Issue Addressed: Space Exploration, Science, Astronomy, Planetary Habitability, Extraterrestrial Life, Technology, Government. Teaching, Education, Education Technology, Pandemic, Public Safety, Career.</p>	<p>02132021 Time: 6:30a Duration: 30 min</p>	<p>2031. Why Europa? Underneath its radiated surface, the icy moon is believed to host a vast ocean similar to Earth's that has ample conditions for complex life. Author David W. Brown joins Viewpoints this week to shed some light on the Jovian moon and some of the challenges that came with the lengthy approval of this deep space mission. Guest: David Brown, writer, author, <i>The Mission</i>. As some schools return back to in-person learning, we take a look at a few of the ways teaching has changed this year, including new safety precautions and the use of continued e-learning technology. Kelly Rigg is an eighth-grade teacher in Ephrata, Pennsylvania and shares what's it's been like to be back teaching in the classroom full-time during a pandemic. Host: Marty Peterson.</p>

<p>Program Name/Segment - Viewpoints</p>	<p>Date: 02202021 Time: 6:30a Duration: 30 min</p>	<p>Program Format/Content Description: In the early 1900's, the Greenwood District in Tulsa, Oklahoma was commonly referred to as the 'Black Wall Street'. It was a predominantly African American town that was booming due to the nearby discovery of oil. It was a wonderful place to live, work and raise a family – but that all changed on May 31, 1921. In a matter of hours, the town was burnt to ashes and its estimated that up to 300 people were murdered. Historian Scott Ellsworth tells the largely untold story of the 1921 Tulsa Race Massacre. Guest: Dr. Scott Ellsworth, lecturer, Department of Afroamerican and African Studies, University of Michigan, author, <i>Death in a Promised Land</i>, <i>The Ground Breaking: An American City and Its Search for Justice</i>. How often do you skim a headline and feel like that's all you need to know? Or gather your daily news from a Twitter or Facebook feed? Economist & journalist Tim Harford joins Viewpoints this week to share the impacts of sensationalized or one-sided information and how we can all become more inquisitive consumers of content. Guest: Tim Harford, economist, journalist, author, <i>The Data Detective: Ten Easy Rules to Make Sense of Statistics</i>.</p>
<p>Issue Addressed: Race, History, Segregation, Black History Month, Racial Issues, Inequality. News, Technology, Data, Social Media, Journalism, Research, Consumerism</p>		

Program Name/Segment - Viewpoints	Date: 02272021	<p>Program Format/Content Description: Crumbling parking lots. Vacant strip malls. These are some of the challenges that suburbs across the country are facing today. What to do with the vacant retail and office space? How do you make people less dependent on cars and more active? Architect June Williamson is a proponent of mixed-use developments that create more efficient suburbia. This vision creates a 15-minute suburb where basic amenities and activities are walkable, and spaces bring people together rather than dividing them with large, empty lawns, lots and physical structures. June Williamson, architect, associate professor or architecture, City College of New York, co-author, <i>Retrofitting Suburbia: Urban Design Strategies for Urgent Challenges</i>. Over the last two decades, Arctic melt has increased by about 60 percent. It's estimated that if all of the glaciers and ice caps were to disappear into the ocean, sea level would rise by 230 feet, wiping out all of the coastal cities and town around the globe. Journalist and author, Andrea Pitzer shares the history of Arctic exploration and how the landscape has changed over time – but not for the better.</p> <p>Guest: Andrea Pitzer, journalist, author, <i>Icebound: Shipwrecked at the Edge of the World</i>.</p>
