Scholars at these schools conducted "armchair" theorizing – developing theories without actually going into cities and towns to talk to the people they were studying. One man – an African-American scholar and author – changed all that with his groundbreaking research and writing about Black people, their culture, and economic and social situations in urban areas. Our guest says that work and the way we compensate the rank-and-file workers needs to change to bring up wages and add benefits to make the work environment more equitable.
