No problem, they'll just move it, but then they run into another problem: lizards, who keep reappearing on the rock. So, the kids make a new cozy spot in the sun for their lizard friends. Eventually, the lizards move and Mrs. Beaver is able to build the bench. Feathers - When Ari finds a particularly cool feather and puts it in his cap, Elinor starts to wonder why birds have feathers in the first place. It's time for more observations! The group splits up and each of the kids observe interesting birds and conclude that birds need feathers for different reasons: to fly, to stay warm, and for decorations, sort of like their very own version of clothes! Ms. Mole confirms they are ALL right. In the end, Ari realizes there's another cool thing you can do with a feather - it makes a perfect sandcastle flag!	PBS	(S)	(CC)	DVI	#106H

Two years on, what's changed and what hasn't in the US, India, and globally in a world that often seems to be teetering on the brink. If our goal is a better society, a world that is sustainable, just, and free, how are we doing, and what role do writers, literature, and language itself play in helping us find our way? This time on the LF Show, we explore all of this and more with Arundhati Roy who joins us from her home in New Delhi, India. Roy is the author of The God of Small Things and The Ministry of Utmost Happiness as well as numerous essays on human rights, environmental justice, and global capitalism. This Spring, a new edition of her book of essays Azadi: Fascism, Fiction, and Freedom in the Time of the Virus will be out from Haymarket Books. 	The art of yoga is really the art of connection. In our practices, we connect the body to the mind; the individual to the universal; the material to the spiritual-and, in this class, the front body to the back body. In yoga terms, the front body represents our individual ego and the back body represents an experience of oneness. Therefore, when we begin a pose from the back it invites us to connect to something bigger than ourselves. Moving from the back body requires us to integrate the strength of the front body. Today, we use this connection in Snowbird and Boat pose.

There has always been such a movement, they know, because they were there. 21:00:00	Eva: A-7063	APTEX	(S)	(CC)	N/A	#0H
	EVA: A-7063 is the incredible true story of an Auschwitz survivor's journey to forgiveness and healing. At the age of 10, Eva Mozes Kor fought to stay alive inside the concentration camp where she and her sister Miriam were being experimented on as one of "Mengele's twins." After decades of torment and pain following her liberation, she came to the epiphany that she needed to forgive the Nazis to move forward with her life. She has since emerged as arguably the best-known and most-active Holocaust survivor in the world. Despite her body failing her, the 4-foot-9, 83-year-old, who lives in Terre Haute, Indiana, circles the globe delivering her messages of healing and self-empowerment. Her lessons go far beyond her own experience, addressing current global atrocities and two of the biggest problems facing today's youth - bullying and discrimination. EVA: A-7063 documents Eva's journey and captures this remarkable Hoosier's legacy as she carries her critically important messages to future generations highlighting the power for good a single dedicated person can have. The documentary serves as a tool for discussing difficult history, discovering shared values and encouraging peace and kindness. Narrated by actor Ed Asner, the film weaves Eva's story through with footage in Poland, Germany, Israel, Romania, England and the United States, along with interviews from CNN's Wolf Blitzer, whose grandparents died in the Holocaust; actor Elliott Gould; and former pro basketball star Ray Allen (a member of the U.S. Holocaust Memorial Council). The film also includes interviews with Holocaust historians Dr. Michael Berenbaum and Dr. Stephen D. Smith; Lucette Lagnado, a Wall Street Journal reporter and author of Children of the Flames, which details Dr. Mengele's (Auschwitz's "Angel of Death") life in counterpoint to the lives of the surviving twins; and Emmanuel Habiman, a survivor of the Rwandan genocide who saw his parents murdered when he was 9-years-old.

21:00:00	Independent Lens Owned: A Tale of Two Americas	PBS	(S)	(CC)	DVI	#2308H
	Owned: A Tale of Two Americas weaves together the history of mid-century housing policy in America and the ramifications of the 2008 housing market collapse. In 2008, the U.S. housing market became the epicenter of an unprecedented global economic collapse. In the years since, protests in cities across the country have highlighted the stark racial disparities that define much of America. The crash of suburbia and urban unrest are not unrelated, the seeds of each germinated by the United States' post-war housing policy. Over time, racist policies have created subcultures in our built environments that are inherently vulnerable and makes clear our society can't continue to thrive in a segregated state. The stories of a retired New York City police officer, an eccentric Southern California realtor, and an ambitious real estate developer in Baltimore embody the promise of U.S. housing policies and the systematic oppression still plaguing many American cities. Ultimately, the communities created by the country's housing history may have more in common than they expect.

00:00:00	Independent Lens Owned: A Tale of Two Americas	PBS	(S)	(CC)	DVI	#2308H
	Owned: A Tale of Two Americas weaves together the history of mid-century housing policy in America and the ramifications of the 2008 housing market collapse. In 2008, the U.S. housing market became the epicenter of an unprecedented global economic collapse. In the years since, protests in cities across the country have highlighted the stark racial disparities that define much of America. The crash of suburbia and urban unrest are not unrelated, the seeds of each germinated by the United States' post-war housing policy. Over time, racist policies have created subcultures in our built environments that are inherently vulnerable and makes clear our society can't continue to thrive in a segregated state. The stories of a retired New York City police officer, an eccentric Southern California realtor, and an ambitious real estate developer in Baltimore embody the promise of U.S. housing policies and the systematic oppression still plaguing many American cities. Ultimately, the communities created by the country's housing history may have more in common than they expect.

But picking the right headgear is hard, and no one seems to recognize him in a fedora or Bavarian fishing hat. After a day of unsuccessful hat shopping George takes matters into his own hands and makes a super hat from craft supplies and toys right at home. Using levers, pop-up techniques and some trial and error, George engineers the Ultimate Yellow Monkey Fun Hat - fully equipped with food dispenser, prop launcher, and animal inflater. But what will happen when the Man accidentally wears the monkey hat at his big presentation? EDUCATIONAL OBJECTIVE: To show that everyone can design solutions to a problem, and that design is a creative process. Creatures of the Night: George thought it was odd that all the food was gone from the bird feeder in a single night. Who or what is eating it all? Could the small animal tracks be a clue? Determined to solve the mystery George stays up all night and finds a baby possum who has lost his family. The two set off on a night journey to find the possum's home and meet some other nocturnal animals (and some very tired "day animals!") on the way. And because their night shadows strike a scary resemblance to the legendary Lake Creature of Lake Wannasink Lake - whose tale Mr. Quint is broadcasting to the entire town on this same night - the furry twosome cause quite a stir. EDUCATIONAL OBJECTIVE: To illustrate some nocturnal animals, in contrast to diurnal, and their habits, specifically opossums. To show some specific characteristics of opossums; how and where they live, what they eat, some sounds and behaviors, defense mechanisms, and their relationships to some other animals.

08:00:00	Curious George A Bridge to Farm/Monkey Fever A Bridge to Farm: When George sees six stranded chicks on an island in a pond it's monkey to the rescue! George tries out several plans. Floating on his back as a monkey life raft is only temporarily successful so George looks for design inspiration in the local railroad and truss bridges. Using marshmallows, toothpicks and playing cards George constructs and then reconstructs a bridge strong enough to support one, then two, and then all six loud peeping chicks - and even the Mother Hen! EDUCATIONAL OBJECTIVE: To show that structures are made up of parts. Monkey Fever: The Man with the Yellow Hat always takes such good care of George, so when the Man comes down with a terrible case of the sniffles, George wants to return the favor. But how? He decides to try his own brand of monkey medicine to nurse the Man back to health, including setting up the bedroom like a real hospital, feeding the Man's cold and starving his fever, and even playing an impromptu game of charades with the pharmacist to get the proper cold medicine. But as George plays doctor for a day, he notices that the Man's symptoms are peculiarly close to those of Betsy's cat, the new mother of five kittens. Could the Man's illness mean he's anticipating feline fatherhood? EDUCATIONAL OBJECTIVE: To illustrate what it's like to be sick with a cold and some ways to take healthy care of yourself when you are sick; get rest, drink fluids, eat healthy food and, if needed, take medicine. To introduce some doctor's tools like thermometers and stethoscopes.	PBS	(S)	(CC)	DVI	#213H

20:30:00	Rick Steves Fascism In Europe In this one-hour special, Rick Steves travels back a century to learn how fascism rose and then fell in Europe - taking millions of people with it. He traces fascism's history from its roots in the turbulent aftermath of World War I, when masses of angry people rose up, to the rise of charismatic leaders who manipulated that anger, and the totalitarian societies they built. In addition, Rick chronicles the brutal measures the leaders used to enforce their ideologies, and discusses the horrific consequences of genocide and total war. And yet despite all this, inspiration can be found by those who resisted. Along the way, Rick visits poignant sights throughout Europe relating to fascism, and talks with Europeans whose families lived through those times. The goal of the RICK STEVES SPECIAL: THE STORY OF FASCISM IN EUROPE is to learn from the hard lessons of 20th-century Europe, and to recognize that ideology in the 21st century. On this month's "Meet the BIPOC Press" with URL Media, our guests explore the unequal media treatment of domestic terrorist threats on African American spaces and consider the racist stereotyping of Black and white youth. We also explore the significance of HBCUs in Black History and the connections with the greater African Diaspora. How can BIPOC media lead the way to spread awareness and protect the legacy, diversity, and innovations at HBCUs? Co-host Sara Lomax-Reese, Co-Founder, URL Media. 	<p>A Yellowstone winter is a brutal one. With temperatures that plunge down to minus 40 degrees Fahrenheit the wildlife has to find strategies to survive. Some animals leave, some hide and some tough it out. Grizzlies hunker down and hibernate, but this winter the temperatures have been erratic and some bears are emerging early. Finding food is a huge challenge, but our camera crews follow one male who's lucky enough to hit the jackpot and find a bison that's been released from its icy tomb down in the valley. But he has to hang onto it while the scavengers hassle him. Great Gray owls suffer as their prey hides under an icy layer of snow that proves almost impossible to break through. Will this lack of food affect their mating and ability to raise a family in the Spring? Cameraman Jeff Hogan is following them to find out. And top wolf biologist Doug Smith explains why he's concerned about the number one predator. With a winter that's had less snow than usual it's favored the prey and the wolves are starving hungry. Host Kirk Johnson who's the Sant Director of the National Museum of Natural History in Washington, visits this unique wilderness to unravel the story of this particular winter in Yellowstone.</p>

Can the family make do, try something new, and still have a good time? Educational Objectives: The Nemicolopterus was a small, toothless pterosaur that lived in the forests of the early cretaceous. Pterosaur diversity included a range in body size, head and body shape, presence and absence of teeth, long tails, preferred habitat, and preferred diet. Tank and the kids try to find another place with a little more privacy (and a lot less Triceratopses), but no matter where they go, the herd follows them. Will Tank be able to find a quiet spot without the herd, or does the herd have a good reason for following Tank around? Educational Objectives: Big-bodied herbivores often form large groups, or "herds," and do so as a strategy to detect and deter predators.</p>

22:00:00	Great Yellowstone Thaw	PBS	(S)	(CC)	N/A	#102H
	Our cameras continue to follow the wildlife dramas in Yellowstone, and Spring brings many new challenges. While the brutal cold temperatures and deep snow of winter have gone, the weather is still erratic and there's the impending danger of the Thaw. When temperatures are high enough to melt the snowpack, millions of tonnes of water will cascade down the mountain, bulldozing everything in its path. Wildlife cameraman Jeff Hogan discovers a nest of Great Gray owls. There are three chicks, but one is a runt, significantly smaller than its siblings and at risk of starvation. And when the worst storms for years hit the Beartooth Mountains, Jeff wonders whether it can hang on. Down on the Snake River the family of beavers is busy making the most of the Spring vegetation. Infra red cameras give Jeff and host Kirk Johnson a secret view of life inside the lodge, as the beavers squabble over food. Kirk also dons a dry suit to head underwater to admire the engineering skills of these rodents. Massive boulders and branches are there to strengthen their dams, but will they be enough to withstand the Thaw. When the torrent of water begins to hit, Kirk joins a hydrologist to help measure the water flow in the rivers and work out how this year's weather has affected the Thaw. And bear expert Casey Anderson follows a mother grizzly and her cubs - and explains that the biggest dangers come not from other predators, but surprisingly from their own kind.

After some very careful bee observations, the kids conclude that bees are tiny and a lot more afraid of us than we are of them. They also realize that instead of swatting at bees, you should stay calm and steady when a bee is around, and you are a lot less likely to get stung. Turtle Crossing - Elinor, Olive and Ari are having a blast riding their bikes along the park's brand-new dirt bike-path. Suddenly, they must slam on the brakes: a sweet little turtle is trying to cross the path to get to a small pond on the other side. After some careful thinking, the kids work together to move their new bike path around the turtle crossing and save the day!

08:00:00	Curious George Curious George, Web Master/The Big Sleepy Curious George, Web Master: While repainting the Endless Park statue for City Heritage Week, the Man's Yellow Hat blows away. While George races to recover his friend's treasure he stumbles across another - an elaborately spun spider web! Can a monkey become a web spinner and catch whatever he wants? George wants to try and he uses thread, rubber bands, tape and twine to create his own traps. The big test of his web spinning skills, however, comes back at the Park when stormy weather threatens both the Man's newly painted statue and the spider webs that inspired his web building in the first place. Can George find a way to use tarp and trees and become a true web master? EDUCATIONAL OBJECTIVE: To show that humans often take ideas observed in nature and use them to develop products to meet their needs and wants. The Big Sleepy: Bill and George go fishing on a brisk fall day. Noticing that George is cold, Bill explains that if George were a bear he'd be able to hibernate - and thus skip the cold and sleep through the winter. George thinks this is a great idea! So he prepares for his own hibernation by eating everything in the house and decorating his room to resemble a dark cave to keep out all the light. But why isn't he tired? Maybe he could get to sleep if he could block out the noises, too. George discovers that pillows and extra blankets might be able to muffle animal noises, but what could possibly block out the Man with the Yellow Hat's tuba sound? EDUCATIONAL OBJECTIVE: To explore various materials and their properties in order to block out light and sound from a room. To introduce the idea of hibernation.	PBS	(S)	(CC)	DVI	#216H

They enlist the help of the Pteranodon Family to try to spread the word that if the dinosaurs and pterosaurs aren't more careful, the Big Pond will run out of fish to eat. But when Crystal realizes that nothing they're doing is actually raising awareness of the issue, she decides to organize a HUGE benefit concert, and everyone agrees to pitch in and help (as long as the King doesn't have to perform)! "Crystal and King Benefit Concert: Part Two" - The "Don't Overfish the Big Pond" Benefit Concert is underway, and it's a HUGE success! Can the kids help Crystal get over her stage fright and get her back onstage, or will the King have to come out of "performance retirement" to help her out? Educational Objectives: Overfishing generally results in a dramatic depletion in the total amount of fish (i.e., biomass). Also, overfishing often causes smaller fish (the prey species of larger fish) to increase in number as the larger predators are removed. If aquatic ecosystems are given a chance to rebound, they often will, as long as the numbers of fish have not been depleted too far.	PBS	(S)	(CC)	DVI	#410H

07:00:00	Yoga In Practice Where You Look Matters	APTEX	(S)	(CC)	N/A	#112H
	As we age things tend to get stuck, both in our perspectives and in our bodies. In yoga, rotated poses can help get us unstuck. Twisting is beneficial for our spines and our digestion, and helps to balance our physical energy. Such poses can also change our perspective from one point of view to another as we twist. In this class we learn the basics of healthy rotations to aid in cleansing our organs, reinvigorating our spine, and refreshing our perspective - because where you look matters.
