Issue: The Importance of the Spiritual Life

Summary: Members of our community that have a sincere spiritual life are more likely to be better citizens and more involved in positive activities within our community. Programming that addresses the importance of a spiritual life fills this need within our community.

Issue: Educating our Citizens

Summary: Keeping our listeners informed of political and civic issues is a need of our community, and we have dedicated programming time to address this need.

Issue: Education of Nation's History

Summary: The foundation of the United States rests on many historical events and documents. Citizens in our community can perform their civic duties and obligations better when they understand the historical perspective of this nation.

Issue: Health and Wellness

Summary: Understanding the need for maintaining both physical and mental health with healthy habits is important for the citizens of our community. Programs highlighting these needs are aired on this station.

Issue: The Issues of Pregnancy and Abortion

Summary: Our community has significant numbers of unwed pregnancies and a number of abortions every year, signs that many members of our community do not understand the significance of these issues. Programming addressing pregnancy and abortion is designed to better inform listeners regarding these issues.

Issue: Financial Literacy

Summary: Americans ages 25-34, including those in our area, have financial behaviors that tend toward debt accumulation, and this is happening during a period of milestone events such as getting married, having children and caring for aging parents. But there is hope: more working time before retirement means that their current financial decisions have a greater impact (positive or negative) on their long term financial security. Programming on financial literacy is intended to help those in our community to take charge of their financial future.
