Chen: "In China," Chen says, "we can criticize Darwin, but not the government; in America, you can criticize the government, but not Darwin." A couple of Chinese researchers recently found this out the hard way when they published a paper on the workings of the human hand in the science journal PLOS ONE. David Klinghoffer at Evolution News and Views remarked that a mob with pitchforks could scarcely rival the reaction this paper's authors earned for using the word : "Creator." From the Christian view, that idea is called "scientism," the notion that science alone offers truth about our world. And it's poisoning not only the peer review process, but the way the public views science itself.

Description: Eric Metaxas gives a glimpse into the speech given by Russell Moore, president of the Southern Baptist Convention's Ethics & Religious Liberty Commission, at the recent Justice Conference in Chicago. Though CNN may refer to him as an "institutional evangelical," Mr. Moore stepped beyond the moral issues of abortion, homosexuality and marriage, and "like a prophet of old, Moore turn the moral spotlight on his young audience." In Moore's words, "We must stand up and say No to racial injustice, No to refugee-bashing, No to immigrant-demonizing, No to predation on the poor, and No to the violence and injustice of abortion." He went on to remind his audience that "There is a great valley that separates the just from the unjust, and the basis for that separation is the gospel of Jesus Christ." At times he may have made his younger audience squirm in their seats by challenging them to step outside of the comfort of their own peer group and not discard the value of much evangelical teaching. On the other hand, Mr. Metaxas reminds older believers to learn from the "Wilberforce-like passion for justice on behalf of the ignored and invisible" which this generation demonstrates. He ends the program by reminding us to "never forget that the Gospel speaks to hungry, hurting bodies as well as to hungry, hurting souls."

Time Aired: 10:25 AM

Duration: 3:59

Description: Host, Eric Metaxas, reflects on the recent remake by Disney of Rudyard Kipling's, "Jungle Book". He finds it surprising that it is being called "racist garbage" and politically correct when the most politically incorrect message could be that boys desperately need their fathers. He cites Jody Bottum who reviewed Kipling's children's works in The Federalist. "The subtext of nearly every one of his children's stories is a boy's desperate need for a father," illustrated by the fact that "he cannot write about a boy without casting every older male in a father role." Mr. Metaxas gives statistics from family researcher, Patrick Fagin of the Heritage Institute, to back his conclusion.

Christians, he says, should not allow the finger pointing to stop them from showing compassion to homosexual victims who are also made in the image of God.

Issue: Abortion

Time Aired: 10:25 AM

Duration: 3:59

Description: In spite of the disappointing Supreme Court ruling against a common-sense Texas law that required abortion providers to have admitting privileges at a nearby hospital and abortion clinics to meet safety standards required for other medical facilities, great strides have recently been made by the pro-life movement. Even with the Supreme Court decision to force Washington state pharmacists to offer abortifacients or go out of business, the pro-life movement is continuing to attract younger people and the popular television show, "Big Bang Theory" as well as in-utero photography show us the "humanity of the preborn" without question.
