He was shocked when he discovered his "Facebook followers have incredible compassion for war victims in South Sudan, for kids who have been trafficked, even for abused chickens, but no obvious empathy for conservative scholars facing discrimination. Metaxas observes that "the skewing of education and news to push an agenda is toxic to free societies."

**Description:** John Stonestreet believes a recent Facebook graphic posted by Planned Parenthood in the aftermath of the shooting deaths of African Americans in Baton Rouge and suburban St. Paul is an instance of the incongruity between the organization's operations and its words. **Time Aired:** 12:45 PM

**Duration:** :60

**Description:** Moira Fleming has anorexia and can identify with people who "feel disconnected" from their body and "she says she hates with "every fiber" of her being the way she looks in the mirror and would be "willing to undergo feats of self-mutilation to achieve a vision that is always just out of grasp." John Stonestreet finds her question very pertinent. Why is transgenderism--which also drives people to mutilate their bodies for an unattainable goal--considered healthy? There is an obvious inconsistency in our deeply confused society.

Mr. Stonestreet suggests that this makes sense. He quotes Michael J. New, an assistant professor of political science at the University of Michigan who says that "this ugly outcome likely is a result of increased sexual risk-taking as a result of condoms in the schools. All at taxpayers' expense."

**Program Name:** Breakpoint

**Issue:** Engaging the Culture

**Time Aired:** 10:25 AM

**Duration:** 3:59

**Description:** John Stonestreet briefly reviews a recent article about Christians engaging the American culture. He disagrees with Andy Crouch's evaluation of America when he says that America is "gloriously diverse" and that it "does not have one monolithic 'culture'" thus we should forget about engaging culture and focus on just loving our neighbor. Stonestreet contends that this isn't an "either/or" proposition. In the case of same-sex marriage (and Pokemon Go!), ideas and practices of a smaller minority can become "mainstream" in astounding time with the support of the "right" people. He states that "loving our neighbors requires cultural concern, analysis, and maybe even action. There's no such thing as loving individuals without engaging the larger cultural trends that may adversely affect them."

**Issue:** The Purpose of Government

**Time Aired:** 10:25 AM

**Duration:** 3:59

**Description:** In 2001, Chuck Colson talked about a concept that would become a cornerstone on his worldview teaching on government and politics. In this re-play of his past commentary he lays the groundwork to his belief that "societies have fallen prey to what writer Jacques Ellul calls 'the political illusion': the idea that government is actually capable of creating the good life, the good society." He asserts that the Bible's purpose for government is not to make people more happy or fulfilled, but to promote justice and restrain evil. When our government can't even manage its own accounting task of balancing the budget, it would definitely not be able to guarantee that its citizens have "rich and full" lives. He asserts this can only be possible by people turning to God as "kingdoms of this world rise and fall, but the Kingdom of God will rule in human hearts for eternity."

On another note, Hillary Clinton is vowing to repeal the Hyde Amendment, which bars direct federal funding for abortions. Donald Trump gave the first GOP Presidential acceptance speech in decades not to mention the abortion issue.

**Issue:** Freedom of Religion

**Time Aired:** 10:25 AM

**Duration:** 3:59

**Description:** In a classic BreakPoint commentary that first aired in 2010, the late Chuck Colson observed a subtle shift in a speech by Hillary Clinton on human rights. She spoke not only about the "right 'to love in the way you choose,' (an obvious attempt at making protecting gay rights a top priority for the U.S. government), she also talked about 'freedom of worship'." Mr. Colson believes this is a big change from the freedom of religion our founders intended in the First Amendment. He states that their desire was to guarantee that "we're not restricted just to living out our faith in the privacy of our homes or church sanctuaries. It means we're free to exercise our religion--and contend for faith--in every area of life." He concludes by saying "as our Founders understood, when that freedom is gone, we will, in short order, lose all of our other freedoms as well."

Neither is polite half-acceptance . . .Hide as you might, the issue will come and find you." Mr. Stonestreet is particularly bothered with Gushee's framing of those who hold historic Christian beliefs on sex and marriage as "organizing legal defense efforts under the guise of religious liberty, and interpreting their plight as religious persecution." In spite of the pressure from the current trends, we are left, he concludes, with "staying at our posts, obeying Christ, loving God and our neighbors . . .we must continue to be the Church, Christ's body on earth."

The shaping of nations begins in the minds of children." In John Stonestreet's review of this e-book, he notes the observation of Mr. Overman that when government took over the school systems, instead of becoming centers for atheism, they have become "secular," neutral and what he refers to as dualistic. A dualist, as defined by Mr. Overman, "is one who. . . doesn't make any significant connection between God's Word and what goes on in the Monday through Friday workplace because . . . 'faith is a personal, private matter, while the workplace is public, and therefore 'secular'." This sort of dualism can even be seen in so-called "Christian" education.
