**Issue:** Pro Life, Law, Government, Abortion  
**Time Aired:** 12:30 PM, 5:25 PM  
**Duration:** :60  
**Description:** Earlier I told you about President Biden's effort to turn America's emergency rooms into abortion facilities. He ridiculously claimed the Emergency Medical Treatment and Active Labor Act was the tool to expand abortion in states where the unborn are protected. Biden said when a woman's life was in danger, a loophole easily abused, this law allowed abortion. The Fifth Circuit Court of Appeals unanimously ruled against the president. A lower court ruled the Texas law protecting the state's unborn babies already provided avenues to deal with such rare occurrences. The Fifth Circuit wrote that the law in question doesn't provide an "unqualified right for the pregnant mother to abort her child." We couldn't ask for a better outcome. Please join me in thanking God for this victory.

**Time Aired:** 12:30 PM, 5:25 PM

**Duration:** :60

**Description:** During his thirty-year career as an abortionist, William Rashbaum took the lives of over twenty-thousand babies. Rashbaum specialized in late-term abortions in the second trimester of pregnancy. His father told him the worst thing a physician can do is commit abortions. During an interview, Rashbaum let his guard down, talking of his recurring nightmares about an unborn baby desperately clinging to the womb. Rashbaum's conscience was certainly impacted but not enough to stop the killing. He did abortions until his health no longer permitted him to do so. Up to the time of his death, this abortionist showed no signs of repentance, but we can't assume he took his hardened heart to the grave. Only the Holy Spirit can say. I pray the account of his nightmares will impact others.

On today's edition of Family Talk, Dr. Jackson recounts that the patient's little baby, born alive, was wrapped in a cold, wet towel, and abandoned to die in a metal basin. Anxiety does not add value to life; instead, it distracts from experiencing God's blessings.

**Time Aired:** 12:30 PM, 5:25 PM  
**Duration:** :60  
**Description:** There's a growing trend of more children being raised by both a father and mother. The Institute for Family Studies says Census Bureau data shows an upward trend dating back nearly a decade. Dr. Nicholas Zill says over seventy-one percent of children live in a two-parent home. This counters the information put out by the New York Times and other legacy media that are preaching the demise of the American family. And the uptick is crossing all racial and ethnic groups. The data also shows couples who marry later are more likely to marry before having children and stay married. Statistics from the Centers for Disease Control show women who are married have fewer abortions. So take heart. In the face of all the global craziness, this is very encouraging news.

**Date:** 1/31/2024

**Program Name:** Life Issues

**Issue:** Legal Abortion, Abortion Complications

**Time Aired:** 12:30 PM, 5:25 PM

**Duration:** :60

**Description:** The Pennsylvania Department of Health released its annual report on abortion and the results should concern us all. They have eighteen abortion mills in the state and half failed health inspections last year. So, we shouldn't be surprised the number of complications from abortion tripled during recent years. A vast majority of the complications involved leaving parts of the baby behind in the uterus. Second was bleeding and third was infection. Another unsurprising fact was abortion in Pennsylvania disproportionately affects Blacks. Blacks account for close to half of all abortions done but represent only eleven percent of the population. Clearly the abortion industry is targeting women of color. These statistics show legal abortion is both dangerous and racist.

**Program Name:** Life Issues

**Issue:** Media, Abortion

**Time Aired:** 12:30 PM, 5:25 PM

**Duration:** :60

**Description:** New bogus research is claiming tens of thousands of rapes occurred, resulting in tens of thousands of pregnancies. And guess what? They supposedly happened in states with laws protecting unborn babies. The numbers are hugely exaggerated. I was not surprised to find out the lead author is a Planned Parenthood abortionist. Another author works for a pro-abortion organization. Highly respected Dr. Michael New said, "The article is frankly one of the worst pieces of advocacy research that I have ever encountered in my years as a social scientist." That's really saying something. What's disturbing is this rubbish was published in a respected medical journal. The truth is now a casualty of an extreme agenda of abortion on demand. **Time Aired:** 12:30 PM, 5:25 PM

**Duration:** :60

**Description:** Earlier I told you about ten pro-life State Senators in Oregon who put their political careers on the line to stop two radical pro-abortion laws. One would've given sex traffickers permission to abort ten-year-old girls without the parents' knowledge. A recently passed state constitutional amendment denies lawmakers from running for reelection if they have ten or more unexcused absences. The senators boycotted the legislation, thus denying a quorum to pass the radical pro-abortion bills. The Oregon Supreme Court upheld the amendment, denying the right of the pro-life senators to run for reelection. Please pray for these brave civil servants who put the protection of their constituents ahead of their own political careers. We need more people like them.

We have a link on our website at [lifeissues.org](http://lifeissues.org) showing the laws in every state that govern these urgent situations. In every state. **Program Name:** Life Issues

**Issue:** Pro Life, Abortion, IVF, Alabama Supreme Cou

**Time Aired:** 12:30 PM, 5:25 PM

**Duration:** :60

**Description:**

The Alabama Supreme Court made judicial history by stating human embryos, created during the in-vitro fertilization process were people too and worthy of protection. I predicted the other side would claim pro-lifers were trying to outlaw contraception. It didn't take long for my prediction to come true. Hillary Clinton tweeted, "They came for abortion first. Now it's IVF and next it'll be birth control." This is a lie, like much of what comes out of the mouths of the Far Left. Alabama didn't ban IVF. It simply protected the human embryos at its center. IVF can be done while protecting human life. True contraception prevents human life from beginning, which is quite different from abortion that brutally and violently kills human life after it's begun. We oppose abortion.

A door opens on the outside of a designated building, the baby is placed inside, triggering an alarm. This tells the people on the inside to retrieve the child. Sight unseen, no questions asked. This has proven effective in saving babies from being abandoned or worse, found dead in a dumpster. **Program Name:** Life Issues

**Issue:** Pro Abortion, Education , First Amendment

**Time Aired:** 12:30 PM, 5:25 PM

**Duration:** :60

**Description:** Pro-abortion public school districts have repeatedly trampled on the First Amendment rights of pro-life students. The latest was Clark County School District in Las Vegas. It denied them access to the school newsletter and the right to post meeting announcements. The school failed to act when a Students for Life member was bullied. So, after three years of this the students sued and won. As a result, there were revisions to the school's handbook and a memo reminding district administrators of their students' rights. The settlement also included financial compensation, plus legal costs. Gee, you'd think word would get around that pro-life students also have a right to free speech, even if they don't like it. God bless these brave students for standing up for the babies.

**Program Name:** The Point

**Issue:** Marriage, Family, Parenthood

**Time Aired:** 12:45 PM

**Duration:** :60

**Description:** According to a recent study by Pew Research, young men are now more likely than young women to say they want children. Specifically, 57% of young men compared to only 45%, a minority, of young women.

On one hand, this may indicate that more young men are pushing back against the cultural stereotypes of being forever-boys, content to play video games, live at home, and not make much of their lives.

On the other hand, a culture in which less than half of young women aspire to have families is troubling indeed, not to mention unsustainable.

This is yet another example where the bad ideas about self, others, and society that emerge from the bad idea of absolute autonomy as the meaning of life, will lead to a world of victims. A better future will require both women and men to embrace that God’s design is good, both for us and for His world.

The tech giant also interfered in a Democrat primary by suspending the accounts of those who supported Hillary Clinton or were critical of Barack Obama. The shenanigans continue this year.
