The price of a gallon of gas went up 13 cents over the past week to reach a national average of three dollars and 28 cents. That may have come as a bit of a shock since prices haven't moved more than a few cents over the past few months. The good news is the reason it should only be temporary. Highly influencing prices right now is the shut down of a massive B-P refinery in Indiana. It's been offline for more than two weeks due to a power outage. That should be fixed soon... and then gas prices will likely go back to moving at a more predictable pace.

STACY: Mankato Public Safety and Fire's annual "Keep the Wreath Bright, Prevent a Red Light" campaign has ended as officials remind residents about the dangers of preventable fires. Every year, Public Safety puts out a wreath with clear light bulbs on Thanksgiving. Through New Years Day, those clear bulbs are replaced with red ones every time there is a preventable fire in Mankato. A blue bulb is placed if an injury occurs in a preventable fire. There were no blue bulbs this year, but the campaign ended with four red bulbs. Fire staff says two of the preventable fires were cooking-related and another was attributed to the improper disposal of smoking material while the fourth remains under investigation.
