American Legacy

<u>Time</u>	<u>Day/Date</u>	<u>Duration</u>
1:00 P.M.	Sat 8/04/07	60:00

"Red Ball Express" - Over 8,000 African-American soldiers serving in WW II met the challenge of keeping the fastest moving army in history supplied, enabling the liberation of France from Nazi occupation in August 1944. Proceeding with the invasion of France, Patton's Third Army advanced so far toward Paris that it cannot be supplied. To keep up the momentum, Allied HQ establishes an elite military truck route. One platoon, Red Ball Express, encountered private enmities, bypassed enemy pockets, minefields, and increasingly perilous missions.

"Valaida Snow" - A glamorous diva, she traveled throughout Europe performing before royalty. Tragically her rise to stardom was derailed when she became ensnared by the Nazis war machine during WWII and imprisoned in a concentration camp in Wester-Faengle. Eighteen months later, she was freed as an exchange prisoner and allowed to return to New York; tragically, Snow never fully recovered from the ordeal.

Brain Attack: Stroke Survival Guide

<u>Time</u>	<u>Day/Date</u>	<u>Duration</u>
1:30 P.M.	Sun 8/12/07	60:00

Every year, about 750,000 Americans suffer a stroke or "brain attack" and 160,000 to 200,000 will die. Yet, one in four Americans can't name a single stroke risk factor. And very few know that stroke is the leading cause of adult disability and the third leading cause of death in the U.S. This one-hour special dispelled myths and misconceptions as well as show viewers how to minimize risk factors and deal with warning signs and symptoms through compelling real life stories, celebrity interviews and meeting leading doctors, including Dr. Clay Johnston, the nation's top stroke doctor based at the University of California, and Dr. Bruce Volpe, a neurologist at Burke Rehabilitation Center in White Plains, NY.
