KZRX
Quarterly Issues/Programs List

KZRX provides its listeners with programming and public service announcements that address issues of concern to our local community. Among the issues determined to be of most concern to the community during the preceding calendar quarter were:

- **Christmas Charity:** American Legion Christmas Charity's 90th year of fundraising for needy
- **Congressional Action:** Congressional action in Washington, DC, on behalf of North Dakota, including work on the Farm Bill, and the Brett Kavanaugh hearings.
- **Economic Development:** Two entities: the Chamber, and the Development Association, are combining to become one entity.
- **Economic Impact:** Local economic impact as the result in the change of oil prices
- **Education:** Power Plant and Process Plant Technology programs begin on campus in January. These programs prepare students for careers in power generating facilities or in refineries and biodiesel facilities. These careers pay well and are in high demand in North Dakota.
- **Employment:** employment trends, opportunities, job types, biggest needs
- **Employment Opportunities & Training:** TrainND Safety Trainer/Manager, about the thousands of available jobs, and training for them.
- **Energy Conference:** Energy, Employment, and Education at the 40th anniversary of the Energy Generation Conference
- **Energy Sector Impact:** senior director of communications with the National Mining Association in Washington, D.C., to recap the November election for Congress and forecast what energy and environmental policy might look like in 2019 with Democrats in control of the House and Republican in control of the Senate and the White House. The National Mining Association is an information center for and a single voice of U.S. mining. The Lignite Energy Council along with several of North Dakota (tm)s lignite mines are members of NMA.
- **Energy Viability:** Ed is the person responsible for all the work involved in discovering that ND has an 800-year supply of economically recoverable of lignite. He will be prepared to talk about the history

of the project that led to this discovery, what determines whether coal reserves are economical or not, and answer other questions. While Ed performed this work more than 15 years ago, people still ask questions about whether the state will someday run out of coal.

- **Pollution:** Discussed public/private partnerships related to carbon capture initiatives/projects and the role of government. It coincides with a workshop on the same topic that Brian will be attending in D.C. and speaking at as a panelist THIS Thursday. The event is sponsored by the U.S. Dept of Energy and Carbon Utilization Research Council.
- **Women in the Energy Industry:** Event geared towards encouraging females to consider careers in the energy industry

**Section I
LOCAL PROGRAMMING**

Section I lists regularly-scheduled and special programs that represent the station's issue-responsive programming providing the most significant treatment of the issues listed above for the calendar quarter.

ISSUE	PROGRAM / TITLE	DESCRIPTION	GUEST	DATE/TIME	DURATION
