The pontifex had never spent any time in America in his life! Seattle is largely known as a center of progressive thought. Even surrounding, more conservative suburbs still early adopt ideas that may take much longer to recognize - recycling comes to mind! It will be interesting to see how our community grows and changes with this current Catholic leader. Mr. Swain explores how a change in religious leadership could potentially shift the ideology of our nation.

Description: As a culture that seems to have plenty of educational opportunities for those that can pay or take on debt, it feels a bit like we're deviating away from a time of vocational training into a

“you must have a degree to succeed” era. The problem many students emerging from school around Washington now, or in recent years, are finding a world without adequate employment opportunities. Couple that with student loan debt, and it’s back to mom and dad’s basement - around WA it may be a flooded basement this time of year! How do those new to the workforce find work in tricky economy?

Subject: Energy Collection

Guest: Greg Kozera

Date Aired: 3/06/16

Time Aired: 10:00 – 10:15 pm

Summary: We spent the better part of the early summer reading about the arctic drilling fleet stationed in ports around the coasts of the Pacific Northwest. Some felt betrayed the port would let a massive oil company use the land of cities that fight for to be known as greener than supporting oil. Others welcomed the growth in jobs and opportunity. Greg Kozera knows a thing or two about energy and how we collect it. He is an engineer with a master’s degree in environmental engineering and an environmentalist with more than 35 years of experience in the natural gas and oil industry. Having designed fracking rigs, he’s well versed on how the system works and presents an opinion on the future of energy in America.

One drive around the University Village parking lot will tell you all you need to know. The frustrations of the holidays and the lack of daylight and sunshine in the winter can’t be helping things, but how do we turn it around?
