Date Aired: 3/06/16

Time Aired: 6:15-6:30 am

Summary: As we watch the seasons begin to shift again, another cycle of life and death will be complete - assuming the earth keeps functioning the way we expect, this time next year we'll be lamenting the summer's slow wind down to crisp fall days, messy hair from knit headwear, and the months of clouds on their way. It is beautiful to watch in the Pacific Northwest as the hills start to change! It's all as natural a part of existence as our life and death. Chris helps us understand how a little humor can go a long way towards softening dark subjects like loss and death.
