#### **This week's focus:**

This was a very interesting and informative presentation about the history of Mount Edgecombe's volcanic and earthquake activity.

The meeting featured a renowned scientist and her recent study of seismic activity associated with Sitka's "Mount Edgecombe". The mountain is currently dormant, and the molten lava is 6 miles below its peak. At present Mount Edgecombe poses no measurable volcanic or earthquake risk. Also discussed were the series of steps that would be taken by Federal, State and Local government in the event of eminent danger from a volcanic eruption or earthquake.
