He has been with SMI since 2000 and oversees content strategy, managing the editorial direction & writing articles. He also helped create their first web site. **Program Substance:** January is a good time to look at all of your finances and review if you need to make any changes. The most important principle of wise money management is putting God's teachings first in every area of your finances. If you do this, the rest of the details will fall into place. If you are to understand and follow Biblical instruction on managing money you first have to know what the Bible says about it and then choose to stand on that instead of the cultural norms. You must create and stick to a budget/spending plan for a solid foundation before you start taking investment risks.

She uses not only traditional talk therapy but also equine therapy, working with horses. **Program Substance:** Definition of OCD is an anxiety related disorder involving basic thoughts that raises the anxiety level which causes the person to typically act out with compulsions that temporarily lowers the anxiety level. Systems are unwanted and obsessions of intrusive thoughts that a person does not want. Often their response to these obsessions are repeated behavioral that are engaged for the purpose of alleviating anxiety that are called compulsions. However, the more you avoid something, the more fearful you become.

ISSUE #3: #451 – Food Manufacturers & Advertising Myths

We ran the following program to address the following issues from:

American Indian Living

Date: 02/26/17

Time of Day: 03:00 P.M.

Duration: TRT 58:00

Brief Description of Program: (Format, participants, content, etc.). Dr. David DeRosa interviewed **Guest – Tana Amen** who as an RN helps people realize that they are not stuck with the brain & body given them. By empowering simple strategies people can transform their brains & bodies into WARRIORS for their own health. She has written several books of which some are “The Brain Warriors Way”, “The Brain Warriors Way Cookbook” and “The Omni Diet”. Unfortunately, manufacturers use food scientists to make food more addictive by turning on the same chemicals in the brain that certain drugs do. Avoid all processed food and use whole foods when possible. It takes time to get over bad habits and the people you spend time with can be contagious as you become more addicted to their bad habits.

ISSUE #4: #086 – Bullying

We ran the following program to address the following issues from:

Home School Companion

Date: 03/21/17

Time of Day: 11:00 A.M.

Duration TRT 29:00

Host Dr. Rose Gamblin and **Guest Cathy Jackson** did a joint interview. Dr. Gamblin was bullied in 7th grade by two boys, Kim & Jeff. Because she was a very spiritual child, they started calling her Pope Rose. When she ignored them, they called her disgusting other names. One day on her way home from school and wearing a new outfit she had made, they attacked her by smearing grease on her dress. She ignored them but the next time when they pushed, shoved and hit her, she fought back with all her might. Even though she got the worst end of the deal, there was no more physical abuse only the name calling. Years later, Jeff called and apologized for his behavior. The definition of bullying is the act of having power over someone else. It includes name calling, taunting, physically striking out and just plain making life miserable for them. Sometimes a child who is a bully was ignored at home in favor of the pretty or smarter sibling. A parent may need to teach/show their child how to fight back. A parent can raise a child without knowing that that child is a bullied. If you are bullied, get help from your home, school or church.

ISSUE #5: #105 – Salvation Army
