Culturally and theologically, work has been defined as secular rather than sacred in America; however, God created us and everything around us. Therefore, our call to a vocation and work is important to God and how we serve others. Whether wage earning in the marketplace or engaging in philanthropy, church, or the political realm, Christians must be committed to God’s will. The Institute for Faith, Work and Economics (TIFWE) offers theological resources and practical ways to serve on their website.</p>
