Topic: Tornado Relief Participation (Gleaning for the World)

Interviews: Jean Smiley Mason; President of Gleaning for the World

Issues: In the aftermath of the tornadoes that devastated Mississippi, Central Virginia based relief agency Gleaning for the World is shipping supplies to the region. Jean Smiley Mason, President of Gleaning, says the agency has already filled on truck load of supplies and is enroute to Mississippi. Central Virginia residents were able to drop off supplies where the truck was located on Wards Road in Lynchburg. Additionally, Jean explained how listeners in other areas can contribute to the relief efforts online and invited listeners to visit their headquarters.

Topic: Education/Mentoring Teens (Iron Lives organization)

Interview: Allison Jordan; Executive Director Iron Lives

Issues: The interview with Allison Jordan covered the organizations history, purpose, and impact in the Central Virginia Community. Iron Lives serves as a bridge between young people, schools, and community organizations and businesses. As Allison explained, this is accomplished through youth development, mentoring partnerships, and character centered athletic programs. Iron lives works as a

support group for area schools in the education and development of young people. The mentorship programs helps young people develop an understanding of community involvement through service projects. Allison also shared the need for volunteers and mentors.

Topic: Affordable Housing (Habitat for Humanity Apostles Build program)

Interview: Gina Dunnivant; Volunteer and Faith Relations Manager Roanoke Habitat for Humanity

Issues: The interview with Gina focused on the Apostles Build. The build is a partnership between Habitat and area churches and ministries in the Roanoke Valley. The Journey also participates in the community effort through interviews with participants, on air mentions about the project, and Journey staff participating in a workday at the build site. Gina shared how recipients are selected for the home ownership program. She explains the application and qualifications that must be met and the recipient's participation in the construction of the home.

Topic: Community Service (Liberty University LU Serve program)

Interview: Steven Gillum; Director of LU Serve

Issues: The city of Lynchburg recently hosted the serve Lynchburg Day giving businesses, organizations, and individuals an opportunity to provide service to the community in several areas. LU Serve, a student group from Liberty University, participated in the service day. One thousand two hundred eighty-nine students volunteered their time to help with clean up efforts, serve in offices, and with different community organizations. Steven Gillum, Director of LU Serve, also shared how students serve nationally

and occasionally internationally with disaster relief efforts. He also encouraged listeners to become involved in area service efforts.

Topic: Education/Science (Virginia Living Museum)

Interview: Rebecca Klienhample; Director Virginia Living Museum Newport News

Issues: The interview covered the Virginia Living Museum's approach to teaching geography and natural science. Rebecca Klienhample explained the various exhibits and displays at the museum and how they provide an interactive learning experience. The museum's origin dates to 1966. The museum provides a way for visitors to understand the environment and the importance of managing and protecting natural resources. Rebecca also shared how the museum partners with area schools for field trips and special visits to the museum.

Topic: Armed Forces Day/Recognition of military service

Interview: Brian Bohlman: Founder of Operation Thank You

Issues: Brian Bohlman explains why Operation Thank You was started. The non-profit organization offers post cards and greeting cards that can be sent to active-duty military members and veterans. Organizations and individuals can order the cards to be used at events. Messages of encouragement and thanks can be written on the cards and returned to Operation Thank You. The organization works with military chaplains to deliver the cards to service members or have them delivered as part of care packages.

Topic: National D-Day Memorial Bedford, Virginia (Memorial Day weekend program)

Interview: Angela Lynch; Director of Communications D-Day Memorial

Issues: Angela Lynch was interviewed about the Memorial Day Weekend activities planned at the National D-Day Memorial in Bedford, VA. She shared how visitors can experience special programs and informed listeners of alternate plans due to possible weather conditions delaying or cancelling events. Angela also highlighted educational opportunities for school age children. The memorial is hosting day camps and mini camps during the summer months to share the historical significance of D-Day. Angela also commented on partnerships with schools and field trip opportunities that are available.

Topic: Health/Air Quality Alerts for Region

Interview: Vance Joyner; National Weather Service

Issues: This segment of The Hometown Journal focused on air quality and potential related health concerns due to the fires originating from Canada. As the VA-Carolina region deals with air quality Code Orange alerts, Vance Joyner of the National Weather service explained what the different codes mean. He also commented on potential health concerns for individuals with respiratory issues. Vance also provided National Weather Service information to listeners regarding where to receive updates on the alerts over the weekend.

Topic: Education/Artificial Intelligence

Interview: Dr. Mark Horstemeyer; Dean of the Liberty University School of Engineering

Issues: Dr. Horstemeyer commented on recent news regarding A.I (Artificial Intelligence). He provided a brief history of A.I. and how the technology has influenced our lives. The interview also covered the benefits and potential risks of A.I. Benefits include uses in the medical profession, computer simulation, and developing more exact data for research. Dr. Horstemeyer explained the risks of A.I. involve the technology not yet fully developed, potential misinformation, and leading to potential conflicts.
