2/1/2021	14:06	10:02	Public Health/ Medicine	Politics	TAKE TWO: When the first doses came on line back in December, Governor Newsom promised to get people vaccinated with equity in mind. But that does not seem to be happening -- the vaccine rollout remains slow and reports are that people with more resources have been getting doses, even if they're not supposed to be eligible yet. Now, the state is switching almost entirely to what's supposed to be a simpler age-based eligibility system, prioritizing people 65 and older. 2/25/2021	14:40	7:30	Politics	Public Health/ Medicine	TAKE TWO: After being closed for almost a year, Six Flags Magic Mountain announced on Twitter late last week that it would reopen in "Spring 2021." There was a LOT of excitement in response to that. But also a lot of skepticism. After all, current state rules only allow theme parks to reopen if the county they're in has reached the yellow tier of less than one daily COVID case per one-hundred-thousand people. And Magic Mountain is in Los Angeles County, which we ALL know is still in the most restrictive purple tier. So the question is -- how likely is it that Six Flags, or any park, could reopen this spring? Robert Niles, who writes the consumer guide Theme Park Insider.
2/25/2021	14:06	11:30	Politics	Public Health/ Medicine	TAKE TWO: It's rare for a city in California to run its own health department-- that's a task usually left to counties. But since the arrival of the coronavirus, some municipalities are looking to split off on their own-- largely to avoid county-mandated health measures and the subsequent economic hardship. One of those is West Covina. The city council there voted earlier this week to move forward with a plan to separate from the LA County Health Officer's jurisdiction... while retaining some department services. But really, how easy IS it for a city to run its own health department - and what are the benefits? We turn to someone who know a lot about that. We've been going through our reckoning here at KPCC, and now it's spilled into the world of podcasting as well. Earlier this month some accusations were made against the host and lead reporter of the popular Gimlet-produced podcast Reply All that's resulted in both of them stepping away from the show. So what does this mean for Gimlet and the podcast industry? Nick Quah,

01/28/2021 - Listener Comment: THANK YOU! I am a proud KPCC member and want to thank the station, all the journalists, editors, producers, technicians and other staff who kept doing your critical job of keeping us informed during the past four years of the previous administration in DC and the past year with the COVID pandemic. Many of you risked your physical health and arrest (were arrested!) to bring us coverage during the protests last summer. Just like the health care workers and first responders, your work is an essential service to our democracy. THANK YOU SO MUCH!

03/01/2021 - Donor Comment ...I have been listening for more than 20 years, but it wasn't until now that I ever felt the need to write a notification. I have been very impressed with KPCC improving reporting on black communities. So often it feels tokenized or that trauma is the only think that get attention or highlighted. I wanted to congratulate you how how you chose to handle the current lack of diversity in Hollywood especially with the confrontation the golden globes are having with their lack of representation. It felt timely, imported and nuianced. I also enjoyed listening and reading the article because I learned something- which is what I like most about KPCC reporter. I had no clue that voting members were not required to wATCh the movies before voting. I really hope to see more of type or informed and textured reporting on our community in the future. Especially as am going to be signing up for a monthly donation of \$20 to help you do it!

03/04/2021 - Listener Comment: "Really enjoyed Libby Denkmann on Air Talk today. KPCC is one of the gems of LA, especially when we can't do much in person."
