Leading up to this point, we've been confronted with difficult testimony, and videos and photos that are, frankly, really hard to watch. Much of the commentary about what's been seen and heard the last few weeks of this trial suggest a specific type of privilege has been on display - one that distinctly comes with being in a position of power.

And t is, to a few of them, but not all, and not to the most important one, the only one that could make it happen. 5/7/2021	14:06	16:30	Politics		TAKE TWO: This week, an ambassadorship could be dangled over LA City Hall where a nibble could set off a scrum. And though we tried to avoid it this week, we can't pretend we don't see the one thousand pound bear in the room. This week Republican John Cox brought a Kodiak bear with him to a press conference and was disappointed that the bear and not him, got all the attention.
5/7/2021	14:25	4:45	Education	Environment	TAKE TWO: here's been a lot of focus on the Inland Empire lately due to the large number of warehouses located out there to hold all the goods we order online - and want delivered immediately. And with that comes a lot of trucks going back and forth - and a lot of emissions. But the residents who've objected to all the pollution now have a new group of allies -- college students. Those students are developing a unique new tool to shape public policy.

5/7/2021	14:32	4:30	Environment	Politics	TAKE TWO: And warehouses are magnets for polluting diesel trucks, which cause health problems. Some 2.4 million people -- mostly lower income -- live within a half-mile of the larger warehouses in our region. Air quality regulators have been working to clean up trucks have for decades, but now they are targeting warehouses. A critical vote is happening today.
5/7/2021	14:40	5:30	Law & Order/Courts/Police	Politics	TAKE TWO: In Part 2 in the series, we explore Gascón's approach to parole from the standpoint of victims. How long should someone stay in prison to satisfy victims' need for justice? KPCC's Frank Stoltze has the story.
5/7/2021	14:46	6:00	Public Health/ Medicine		TAKE TWO: We've talked about how demand for COVID-19 vaccines has dropped off - yet more than 60 percent of Americans still need at least one shot. The reasons for the decrease are many, but one simple one might be a fear of needles. But there's are a few techniques to help you get over it.
5/7/2021	14:55	3:30	Arts And Culture	Arts And Culture	TAKE TWO: Finally, the weekend is here, and with Mother's Day right around the corner, we have some event ideas for you.
5/10/2021	14:06	10:40	Politics	Economics and Business	TAKE TWO: On Monday, Gov. Gavin Newsom unveiled his \$100 billion "California Comeback" recovery plan. This includes \$5 billion towards rental relief and \$600 stimulus checks going out to nearly two thirds of all Californians.
5/10/2021	14:20	15:30	Public Health/ Medicine		TAKE TWO: Things are opening back all over Los Angeles County yet the virus is still out there. This weekend, after a drastic decline, COVID-19 cases and deaths ticked back up slightly. The big task now is to vaccinate more people, since only about 40% of the population is fully inoculated in Los Angeles County. Paula Cannon from USC Keck joins Take Two to answer some of latest questions raised about dealing with COVID-19.
5/10/2021	14:37	8:30	Arts And Culture	Economics and Business	TAKE TWO: After several months of discussion, Rep. Ted Lieu introduced the 21st Century Federal Writers' Project. Modeled after FDR's Works Progress Administration program on the 1930s, this Writers' Project would provide \$60 million administered by the Department of Labor to nonprofits, libraries, news outlets and communications unions to provide work to out of work and underemployed writers and journalists to tell the stories of the pandemic.
5/10/2021	14:47	5:10	Environment	Economics and Business	TAKE TWO: The South Coast Air Quality Management District board on Friday approved a rule that would curb diesel emissions from thousands of trucks that travel back and forth carrying goods being housed in the massive amount of warehouses now populating areas like the Inland Empire. Research shows that the mostly minority communities living around these warehouses have experienced a significant uptick in pollution that's triggered ill health effects.
5/10/2021	14:53	4:40	Arts And Culture	Arts And Culture	TAKE TWO: The Los Angeles reported earlier today that after months of controversy with the Hollywood Foreign Press Association, NBC has said it will not air the Golden Globes next year.
5/11/2021	14:06	16:00	Housing Issues	Economics and Business	TAKE TWO: Governor Newsom proposed \$9 billion in state funding to purchase hotels, motels and vacant building and convert them into interim or permanent housing. How successful could that program be?
5/11/2021	14:25	6:30	Public Health/ Medicine	Arts And Culture	TAKE TWO: Even though many of us might feel like we've got more of a handle on the coronavirus pandemic, none of us can forget this unbelievable year. Especially folks who've really been in the trenches. Lisa Fagundes is normally a librarian at the San Francisco Public Library. But starting last April, she and thousands of other city and state workers were redeployed to become contact tracers, calling people who may have been exposed to the virus.

5/11/2021	14:35	8:15	War/ Military Events/ Military Culture	Gender Equity/Transgender Issues	TAKE TWO: A group of female recruits completed Marine boot camp in San Diego this spring. It's the first time the Corps has trained women outside of Parris Island, South Carolina. Congress has mandated that the Marines fully integrate women into its boot camps. Still, it likely will be several more years before that happens.
5/11/2021	14:45	10:30	Economics and Business	Environment	TAKE TWO: A big piece of California's climate policy is our cap-and-trade program, designed to limit overall carbon emissions. But what if the go-to strategy isn't working as well as its intended? Take Two talks with James Temple, senior editor for climate and energy at MIT Technology Review.
5/12/2021	14:06	14:00	Environment		TAKE TWO; It's getting dry out there. Governor Newsom declared a drought emergency in 41 counties earlier this week...and the U-S Drought Monitor has much of the state in the red and that means EXTREME drought. But since we've been here before not that long ago, the question we have is - is it drought ...or just normal?
5/12/2021	14:25	7:00	Politics	Law & Order/Courts/Police	TAKE TWO: California has had a new Attorney General for just a few weeks but Rob Bonta has been a busy guy. From hate crimes to law enforcement to the effects of social media on youth, his office had made number of announcements. Take Two talks with Marisa Lagos, political correspondent for KQED and co-host of the Political Breakdown podcast.
5/12/2021	14:35	4:15	Public Health/ Medicine	Racial Relations	TAKE TWO: Young Latino and Black Angelenos are lagging way behind in getting the COVID-19 vaccine. At a high school in one of the least vaccinated areas of LA, KPCC health reporter Jackie Fortier spoke with a principal and high school seniors about getting the vaccine.
5/12/2021	14:40	7:45	Education	Economics and Business	TAKE TWO: On Tuesday afternoon, Governor Newsom unveiled his multibillion dollar education budget. This budget includes universal transitional kindergarten, college savings plans for low-income students and money for school re-openings in the fall.
5/12/2021	14:50	8:50	Entertainment Industry	Arts And Culture	TAKE TWO: John Horn joins Take Two to discuss the latest entertainment news - from NBC not airing the Golden Globes to the end of "The Ellen DeGeneres Show".
5/13/2021	14:06	15:00	Education	Public Health/ Medicine	TAKE TWO: For many, one of the biggest points of anxiety during this pandemic has been about school and whether to send kids back to campus. Just yesterday, Governor Newsom said all school districts in the state should reopen for full-time 5 day-a- week instruction. He tied that to BILLIONS in funding proposals...although he stopped short of a mandate. And today Randi Weingarten, president of the American Federation of Teachers - the second-largest teachers' union in the U-S - also called for a full reopening of the nation's schools. Yet, resistance among many families remains.
5/13/2021	14:25	9:30	Public Health/ Medicine		TAKE TWO: As coronavirus cases decrease and more people get vaccinated, the Centers for Disease Control and Prevention is loosening guidelines around masks and not-so-distanced get together. But there are still some people who want to continue wearing their masks anyway ... and no, they're not just doing it out of an irrational fear or to score political points.
5/13/2021	14:35	8:30	Housing Issues	Law & Order/Courts/Police	TAKE TWO: You almost can't drive around the City of LA for too long without seeing a homeless encampment. It's a roof over someone's head but along with it comes some of the same things that anyone who lives in a house has...ways to cook food and keep warm. Sometimes these things that most of us take for granted get out of control for the people who are doing it on a sidewalk. The number of encampment fires have been on the rise the past free years...leading to loss of life and property for both the housed and unhoused.

5/13/2021	14:45	7:10	Education	Economics and Business	TAKE TWO: In 2018, Governor Jerry Brown formed Calbright College, a free, innovative online school with high hopes to increase access to job training and education for underserved Californians. The program, which got off to a rocky start, has come under audit by the state... and the findings are not good. State Auditor Elaine Howle published a full report with some of their findings. These include low retention rates, lack of a detailed spending strategy, and poor student career support.
5/14/2021	14:06	17:00	Politics	Economics and Business	TAKE TWO: For today's State of Affairs we've got Gavin Newsom's revised state budget to get into. But first we're going to go back a bit in the life of CA Congressman Kevin McCarthy. We'll start November 5th and weave through January 2nd, a two month stretch where it sounded like he had trouble accepting the fact that Donald Trump lost the election.
5/14/2021	14:25	11:30	Public Health/ Medicine		TAKE TWO: It's been a big week with regards to the coronavirus - kids ages 12 to 15 are now eligible for the vaccine - and LA County's public health department said we could reach herd immunity by July. BUT there's still a whole lot of confusion about masks.
5/14/2021	14:37	8:00	Economics and Business	Politics	TAKE TWO: Los Angeles County is proposing an ambitious plan - give a least 1,000 dollars to 1,000 families for three years. Supervisors Holly Mitchell and Sheila Khuel are the two officials behind this Universal Basic Income pilot ...and the full Board is expected to vote on it next week. It follows similar moves by LA City, Long Beach, Compton and communities of South LA.
5/14/2021	14:47	6:45	Education	Economics and Business	TAKE TWO: Governor Gavin Newsom is proposing billions for a Transitional Kindergarten throughout California, as well as other program for our youngest citizens.

04/27/21 Listener Comment: "You had the best coverage for figuring out what to do with Covid vaccines. Every morning I heard Larry speaking with a person whom I've forgotten her name, but she had all the info here on LAist, so getting a vaccine appointment was a piece of cake (after I tried on the county's website to no avail)! Thank you for keeping us well informed. You do a great job!!!!"

5/26/21 - Tweet from NPR's Audie Cornish: this was a thoroughly reported and thoroughly moving story -- well worth the listen.
