Request for Special Temporary Authority for six months to remain silent due to technical problems.

Station WXXK, Clarksburg, West Virginia, Facility ID 67102.

Radio station WXXK underwent severe damage in a lightning strike on August 24, 2022. Licensee needs parts to repair multiple isocouplers at the base of its tower as well other unknown other areas since the strike was so serious. With the supply chain problems for parts, Licensee cannot determine exactly when operations will be restored. However Licensee will try its best to return to the operation as soon as it is possible.

The above information is to the best of my knowledge and belief.
