**(Oct 1<sup>st</sup> – Dec 31<sup>st</sup>)**

Prepared by:

Jared Andrea, Programming Coordinator

Date Filed: January 5, 2024

**Issues of Concern to Los Angeles, CA  
Addressed in Responsive Programming in the  
4th Quarter, 2023**

<u><i>Subject</i></u>	<u><i>Description of Issue of Concern</i></u>
1. Health	Information regarding the latest breakthroughs in health care is needed, including new discoveries, programs and services. Disaster preparedness to preserve one's health.
2. Economy	Our local economy has been slow to recover from the recent recession. Information on services to assist the public is needed.
3. Education & Child Care	Whether being abused, needing special education, fighting truancy or needing college prep, children & parents need assistance.
4. Local Community Services	Mentioned are free or low-cost community services available to the public to assist with spousal abuse, child abuse, animal abuse or even the arts. Information on free programs is featured.
5. Crime & Drugs	Crime and drug abuse remain a key issue in our area.
6. Public Safety	The safety of the public is priority and information on how to prevent danger and maintain caution.
7. Animals & Wildlife	As wildlife is constantly affected by the perils of man and nature, OpenLine helps to provide the means of animal protection and adoption information needed to sustain the ecosystem and its diverse chain of useful inhabitants.
8. Politics	Highlighting propositions, political issues, and presidential candidates during this year's Elections.
9. Environment	From our coastal areas to our forests, the environment needs our help to preserve and restore it.

Date: 10/22/23

Time: 6:00AM

Duration: 15 minutes of a 60-minute program

Guest: Victor Armstrong

As part of Audacy's I'm Listening program, David O'Leary speaks with n the American Foundation for Suicide Prevention's Vice President for Health Equity and Engagement Victor Armstrong. Their focus is on Children's Mental Health for National Children's Health Month.

***Open Line***

Date: 10/29/23

Time: 6:00AM

Duration: 6 minutes of a 60-minute program

Guest: Dr. Moe Gelbart

Why you should make time for oddball rituals. Even the small ones add richness to our lives even though you may think they're quirky. KNX's Rob Archer and Chris Sedens speak with Dr. Moe Gelbart, director of behavioral health at Torrance Memorial Medical Center

***Open Line***

Date: 11/5/23

Time: 6:00AM

Duration: 4 minutes of a 60-minute program

Guest: Dr. Mahnaz Rashti

Kids in California have rotting teeth. California ranks among the worst states when it comes to pediatric dental disease. Is the pandemic to blame as parents skipped their kids' dental visits? Or is the cost of dental care just way too expensive now? KNX's Rob Archer and Charles Feldman speak with Dr. Mahnaz Rashti, Beverly Hills dentist/periodontist

***Open Line***

Date: 11/5/23

Time: 6:00AM

Duration: 5 minutes of a 60-minute program

Guest: Kevin Hines

Imagine jumping off the Golden Gate Bridge and living to talk about it. Kevin Hines is just one of 36 people to do it. Even though surviving his suicide attempt gave him a new perspective on life 23 years ago, he still struggles with mental health. He talks about his progress and journey in a new book. KNX's Charles Feldman and Rob Archer speak with Kevin Hines, author of *The Art of Being Broken: How Storytelling Saves Lives*

<b>ISSUE:      Health (continued)</b>
---------------------------------------

***Open Line***

Date: 11/5/23

Time: 6:00AM

Duration: 7 minutes of a 60-minute program

Guest: Robert Sapolsky

Stanford scientist, after decades of study, concludes: we don't have free will. He's detailing his findings in a new book. So what does he mean exactly by saying we don't have free will? Is it as simple as it sounds? KNX's Rob Archer and Charles Feldman speaks with Robert Sapolsky, neurobiologist at Stanford University; author of *DETERMINED: A Science of Life Without Free Will*

***Open Line***

<b>ISSUE:      Health (continued)</b>
---------------------------------------

***Open Line***

Date: 11/26/23

Time: 6:00AM

Duration: 5 minutes of a 60-minute program

Guest: Dr. Steven Broglio

Repeat concussion warning. There is some really concerning news out that should give pause to parents of high school athletes. High school athletes who reported two or more concussions in one year ... were twice as likely to report suicide attempts when compared to students reporting just one incident of head trauma. This is yet another reason to worry about concussions for those kids playing intense contact sports like football, hockey or wrestling. KNX's Charles Feldman speaks with Dr. Steven Broglio is director of the University of Michigan Concussion Center and a study author.

***Open Line***

Date: 11/26/23

Time: 6:00AM

Duration: 4 minutes of a 60-minute program

Guest: Chris Schneider

Alzheimer's Association praises Rosalynn Carter. KNX News' Elsa Ramon talked to Chris Schneider from the Alzheimer's Foundation of America about how former First Lady Rosalynn Carter leaves a positive legacy when it comes to facing dementia and similar diseases.

***Open Line***

Date: 12/17/23

Time: 6:00AM

Duration: 5 minutes of a 60-minute program

Guest: Ryan Doser

Asking CHAT GPT for medical advice could be a bad idea. KNX News Chief Correspondent Charles Feldman talks about a new study that finds Chat GPT gets a lot of medical questions wrong. Ryan Doser is VP of Inbound Marketing at Empathy First Media and is the website admin of AI Insider Tips.

<b>ISSUE:      Health (continued)</b>
---------------------------------------

***Open Line***

Date: 12/17/23

Time: 6:00AM

Duration: 4 minutes of a 60-minute program

Guest: Dr. Jose Arciniega

Accidental poisonings with weight loss meds. There's a rise in accidental poisonings related to weight loss medications like Ozempic and Wegovy...which poison centers across the country are reporting a 1500 PERCENT surge in accidental overdoses. Dr. Jose Arciniega-Regional Medical Director of Dignity Health joins LA's Afternoon News to talk about it.

***Open Line***

Date: 12/24/23

Time: 6:00AM

Duration: 5 minutes of a 60-minute program

Guest: Dr. Ziyad Al-Aly

Long flu joins long COVID in viral aftermath. A lasting legacy of the COVID pandemic could be changing the way that scientists, doctors ... and all of the rest of us ... view the impacts of a viral infection. By now most people are familiar with the condition of Long COVID, which has afflicted millions of Americans with a myriad of mysterious symptoms months ... or even years ... after an initial COVID infection. But new research out this week in the journal "Lancet" finds that there could be such a thing as "Long Flu." Dr. Ziyad Al-Aly is an epidemiologist at Washington University in St. Louis ... and author of this new study.

***Open Line***

Date: 12/31/23

Time: 6:00AM

Duration: 4 minutes of a 60-minute program

Guest: Dr. David Cutler

Does it feel like lots of your friends and family members are getting sick right now? That's because about 23-percent of people in L-A County are currently reporting a cough or shortness of breath right now, according to a recent survey. Urgent cares and emergency rooms around Southern California are seeing an influx of patients complaining of symptoms ranging from fevers to coughs to sore throats. We spoke to Dr. David Cutler, Chairman of the Santa Monica Family Physicians medical group, he says COVID cases are rapidly on the rise ... and some people might not even realize they're infected. Dr. Cutler says you can be sick with multiple viruses at once ... he saw one patient who had COVID, RSV AND strep throat.

(Oct 1st - Dec 31st)

<b>ISSUE:</b>	<b>Economy</b>
---------------	----------------

***Open Line***

Date: 10/1/23

Time: 6:00AM

Duration: 4 minutes of a 60-minute program

Guest: Andrew Lipow

Gas prices here in southern California are shooting up even higher. How much higher can they possibly get? Why is this happening and is there relief in sight? KNX's Charles Feldman and Rob Archer speak with Andrew Lipow, oil industry analyst

***Open Line***

Date: 10/1/23

Time: 6:00AM

Duration: 4 minutes of a 60-minute program

Guest: Richard Green

Even California's cheaper areas are getting expensive. New data show that even inland areas such as Modesto, Bakersfield and Stockton are significantly less affordable compared with the national average, further worsening the housing crunch in a state facing an unprecedented crisis. KNX's Rob Archer and Charles Feldman speak with Richard Green, Director and Chair of the USC Lusk Center for Real Estate

***Open Line***

Date: 10/1/23

Time: 6:00AM

Duration: 5 minutes of a 60-minute program

Guest: Teresa Smith

More and more baby boomers are sliding into homelessness. A big reason is the high cost of housing that hits people hard who are on fixed incomes. Not to mention, because of economic recessions, many older people weren't able to save as much as they would've liked. KNX's Charles Feldman and Rob Archer speak with Teresa Smith, CEO of Dreams for Change, a San Diego-based organization that helps homeless people

<b>ISSUE:</b>	<b>Economy (cont.)</b>
---------------	------------------------

***Open Line***

Date: 10/22/23

Time: 6:00AM

Duration: 6 minutes of a 60-minute program

Guest: Brett Good

The push by employers to get American workers back into the office appears to be working. Fewer than 26% of U.S. households still have someone working remotely at least one day a week, a sharp decline from the early-2021 peak of 37%, according to the two latest census bureau household pulse surveys. KNX's Elsa Ramon and Rob Archer speak with Brett Good, senior district president with talent solutions and business consulting firm Robert Half

***Open Line***

Date: 10/22/23

Time: 6:00AM

Duration: 6 minutes of a 60-minute program

Guest: Juliana Kaplan

Can anything possibly stop Taylor Swift? She's boosting local economies, giving the NFL a whole new audience of viewers and is now possibly saving movie theaters. "Taylor Swift: The Eras Tour" opened with 96-million dollars this weekend to easily lead all films in North America. The blockbuster opening was the highest ever for a concert film. KNX's Rob Archer and Elsa Ramon speak with Juliana Kaplan, Labor and Inequality Reporter for Insider; she's been covering Taylor Swift's business success

***Open Line***

Date: 11/5/23

Hollywood actors and studios may be close to ending strike-or not. Negotiations continue after more than 100 days. KNX's Rob Archer and Charles Feldman speak with Entertainment attorney Trey Lovell

<b>ISSUE:</b> <b>Economy</b>
------------------------------

***Open Line***

Date: 11/5/23

Time: 6:00AM

Duration: 6 minutes of a 60-minute program

Guest: Aleksandar Tomic

The country's economy expanded at a robust 4.9% annual rate from July through September as Americans defied higher prices, rising interest rates and widespread forecasts of a recession to spend at a brisk pace. But many people still feel uneasy about the economy and there are still warning signs such as more and more people being late now on car payments. KNX's Rob Archer and Chris Sedens speak with Aleksandar Tomic, associate dean and economist at Boston College

***Open Line***

Date: 11/5/23

Time: 6:00AM

Duration: 4 minutes of a 60-minute program

Guest: Kristin Myers

KNX Chief Correspondent Charles Feldman discusses how some stores are now charging 33% interest on their credit cards, surging past that symbolic 30% barrier. He speaks with Kristin Myers, who is a business journalist and personal finance expert.

***Open Line***

Date: 11/26/23

Time: 6:00AM

Duration: 4 minutes of a 60-minute program

Guest: Ronnie Kay

NFL steps toward TV production. The National Football League is already a media juggernaut ... after all, 83 of the 100 most-viewed television broadcasts last year last year were NFL games. But the league has been greatly expanding its reach. The NFL is now producing shows and documentaries ... outside of the game broadcasts themselves ... for streaming networks like Netflix and Amazon Prime. KNX's Charles Feldman speaks with Ronnie Kay-who has up-close-and-personal experience with this kind of sports media ... she used to produce TV programming for the NBA. She's now a film & TV director, show-runner and lecturer at NYU's Tisch School

Time: 6:00AM

Duration: 5 minutes of a 60-minute program

Guest: Erin Griffith

What's next after smartphones? The first Blackberry ... a pager that could also receive email and browse the internet ... went on sale in 1999. Less than 10 years later, the first Apple iPhone hit the market. And from that point forward smartphones became an integral part of our everyday lives. But if you've ever wondered what comes next after smartphones .... the gadget that promises to offer capabilities beyond your iPhone will hit markets over the holidays. It's called the "Ai Pin" and we're going in depth on it. KNX's Charles Feldman speaks with Erin Griffith-who covers Silicon Valley and tech industry for the New York Times, and she's tried out an Ai Pin device.

***Open Line***

Date: 12/3/23

Duration: 4 minutes of a 60-minute program

Guest: Daniel Yukelson

Rents going up in 2024. Rents will be going up across much of Los Angeles in 2024, that we know. The LA City Council went over some of the mechanics of the coming rent increase, and what that means for tenants in rent-controlled apartment buildings, which will also be seeing a boost in rents in the new year. It gets a little complicated .... KNX chief correspondent Charles Feldman is here to help walk us through it. Rents are set to increase somewhere between 4 and 6-percent, but it will be highly variable depending on where you live....Daniel Yukelson is executive director and CEO of the Apartment Association of Greater Los Angeles.

Guest: Robert Wood

You are probably well aware of California's reputation when it comes to high taxes. And indeed, Californians ... collectively ... are among the highest taxed residents of any state in the country. But when people bring Texas into the conversation ... as an example of a low tax state ... we're going to give you some ammunition to stick up for the Golden State. That's because some new analysis out of the Houston Chronicle shows that tax rates in Texas are eerily similar to those in California. And in fact middle class Californians might be paying FEWER taxes than those with comparable incomes in Texas. Robert Wood is a practicing tax attorney in San Francisco ... and a columnist at Forbes.

Guest: Corey Dantzer

Tami has a California conversation with Corey Dantzer, executive director of the Al Wooten Jr. Youth Center, the other beneficiary of the KROQ Almost Acoustic Christmas concert. At the heart of their mission for "good citizenship and academic excellence" is a desire to ensure that every student avoids the kind of lifestyle and overcomes the kinds of challenges that led to the murder of Al Wooten, Jr.

The Wooten Center has come a long way since 1990 when their founder, Myrtle Faye Rumph, opened the center in honor of her son's life. The challenge of serving more than 400 students in grades 3-12 annually online and onsite at our youth center and other sites in the South LA area and enhancing our offerings for these bright minds demand that we continually upgrade our programs and facilities. Find out more about the center and ways you can help at

[www.wootencenter.org](http://www.wootencenter.org)

A new study finds a spacecraft left behind by U.S. astronauts on the lunar surface could be causing small tremors known as moonquakes. Researchers revealed the previously unknown form of seismic activity on the moon for the first time through an analysis of apollo-era data using modern algorithms. So what can we learn from this? KNX's Rob Archer and Charles Feldman speak with Angela Marusiak, research professor at the University of Arizona's Lunar and Planetary Laboratory

Architecture students at Woodbury University in Burbank have used 3d printing to build a home. It's the first 3d printed structure to be permitted and built in the area. It could be the answer to the region's housing shortage? They were able to get this project built for just over \$250,000. KNX's Rob Archer and Charles Feldman speak with Aaron Gensler, Chair of Architecture at Woodbury University's LA campus in Burbank

Guest: Aaron Hill

Artificial intelligence better at weather prediction. Let's take the series of storms coming into Southern California this week as an example: the forecast has changed a lot over the last few days about how much and when it was going to rain. But new research out suggests that AI-machines are far more accurate ... and quicker ... in forecasting the weather. Google's AI-powered weather modeling just blew human meteorologists and old government weather models out of the water....KNX's Charles Feldman speaks with Aaron Hill- a professor of meteorology at the University of Oklahoma ... who has been studying machine learning and weather forecasting.

Guest: Shang-Ping Xie and Alex Tardy

This week's storms have broken up an unseasonably long, dry period for Southern California to kick off our winter ... and this comes during an El Nino year, which we've come to understand means a REALLY wet winter. But an El Nino pattern in the Pacific Ocean does NOT automatically guarantee a wet winter for California ... it's a problem of expectations that's the fault of both us in the media ... and the unpredictability of climate change. Shang-Ping Xie is a climatologist at the Scripps Institute in San Diego ... he tells KNX News that El Nino does increase the ODDS of a wetter winter ... and that hasn't changed. Alex Tardy is a meteorologist with the National Weather Service ... he tells KNX News that in the late 1990's, after one very wet winter, the media caught onto El Nino stories ... and in the process, might have distorted our view of its meaning. So odds-making is difficult ... and then, Tardy says, climate change throws us curveballs. At least in the short-term, El Nino does look to be coming alive for California: Tardy says this week's storms could be quite powerful ... and there's another round of stormy action coming up on Christmas week.
