WLIV AM 920 & WLIV FM 104.7

The coming influenza season is the topic of many news and information features in the media at this time of the year.

Knowing that getting a flu shot in a timely manner could mean the difference in getting and not getting the flu (and in extreme cases can be a matter of life and death) WLIV AM & FM began airing a series as part of our FOCUS ON COMMUNITY in which we interviewed Megan Reeder with the Overton County Health Department.

Reeder outlined the special, even critical need for certain at-risk persons to get a flu shot in advance of the onset of flu season. The local health department also announced the availability of flu shots by way of our feature.

Both WLIV AM & WLIV FM are glad to play a role in making our community healthier this coming flu season.

Placed in the public file October 11, 2018.
