

ISSUES AND PROGRAMS LIST  
EPDE  
FLORENCE & MYRTLE BEACH, SOUTH CAROLINA

April 1, 2022 – June 30, 2022

## LIST OF ISSUES

### **INFLATION/RENT INCREASES IN MYRTLE BEACH**

The Myrtle Beach area is now the #1 fastest growing area, with rent increases up 36% since before the pandemic. As the nation deals with rising inflation – affecting everything from food to gas prices – we focused on the impact this is having on our communities and industries.

### **FLOODING**

In the past five years, our communities have dealt with a number of major weather events, from a historic 1,000-year flood in 2015 to several hurricanes like Matthew and Florence. While those events caused flooding, we're also now seeing flooding after minor weather events. In some cases, development is to blame, in others it's a lack of attention or resources to flood mitigation. We continue to be a voice for those in our community who are seeing flooding over and over again.

### **GROWTH AND DEVELOPMENT**

Horry County is one of the fastest growing areas in the country. This quarter we saw a number of major developments along highways in our community. Residents are concerned that the roads are not able to handle the number of cars safely. We covered discussions about building moratoriums and how the growth puts a strain on resources in our community. It also leads to issues with stormwater drainage, which leads to flooding. As we build up more and more, places begin to see flooding that haven't before. We are committed to covering the growth in our area and the challenges it presents to our communities.

Below is a list of some of the significant issues responded to by Station EPDE, Florence/Myrtle Beach, South Carolina, along with the most significant programming treatment of those issues for the period April 1, 2022 to June 30, 2022. This list is by no means exhaustive. The order in which the issues appear does not reflect any priority or significance.
