June 4, M	Today's Feature comes from With Good Reason, Biologist Kevin Hamed discovered an alarming number of tiny skulls stuck in glass bottles found roadside litter, and James Vance hopes to find ways to help animals avoid crossing a particularly high-traffic area.
June 5, T	Today's Feature comes from With Good Reason, Carrie "Honeybee" Brown has planted apiaries in community gardens across the city in an effort to save the ailing honeybee, and Writing professor Alex Parrish argues the importance of recognizing animal voices.
June 6, W	Today's Feature comes from Radio K, Real College Podcast looks at some of the amazing research happening at the University of Minnesota, past scientific breakthroughs, and the people who make science happen.
June 7, TH	Today's feature is part one of <i>Dying Words</i> , the story of Jeff Schmalz and his groundbreaking reporting on AIDS for the <i>New York Times</i> even as he was dying of the disease in the early 1990s. Through Jeff's story, it also describes the experiences of gay and lesbian journalists during a much less tolerant time in major news organizations.
June 8, F	Today's feature is part two of Jeff Schultz and his groundbreaking reporting on AIDS for the <i>New York Times</i> . Yesterday we heard the story of how Schultz himself was diagnosed with AIDS and what effects the disease not only on him but his career. Today we hear how Schultz turned his death sentence into a reason to live.
June 11, M	Today's Feature comes from With Good Reason, Anh Do came to America as a Vietnamese refugee when he was just nine years old. He turned to drawing as a form of communication, and decades later he's still speaking through animation.
June 12, T	Untold Story of Central Minnesota, Charles Lindbergh's fall from grace just before World War II.
June 13, W	On today's feature We go back to the night in June 1969 at the New York City Stonewall Inn that sparked the LGBT rights movement. On today's show from making contact we'll hear about the day that galvanized a generation and the continued fight for LGBT civil rights.
June 14, TH	Space science can help track what's happening on Earth. In this episode, Orbital Path talks landslides and the satellites that monitor them for the third anniversary of the deadliest landslide in US history. On March 22, 2014 a 650-foot hillside collapsed and covered the community of Oso, Washington. Forty-three people died. Hear from scientists working to investigate this landslide and predict future ones, as well as a woman who witnessed the landslide
June 15, F	In honor of father's day coming up this weekend, today's feature is all

	about dads. From Dad jokes to presents from dad and of course treasured memories of dad. From PRX and the Moth radio hour here is a collection of stories about dads.
June 18, M	N/A
June 19, T	Untold Stories of Central Minnesota: 10 Years of Legacy Amendment.
June 20, W	WGR In todays feature from with good reason first we explore how Slow-motion playback is ubiquitous in the world of sports, but may be problematic when used in courts of law. <b>Ben Converse</b> has studied how viewing videos in slow motion can cause people to think an action is more intentional. Then with The U.S. having the highest prison population rate in the world, it can take a toll on the children of incarcerated parents. <b>Danielle Dallaire</b> has studied how having parents in prison can stigmatize children and lead to increased risk behavior.
June 21, TH	Untold Stories of Central Minnesota: Fyaad '18.
June 22, F	WGR Today's feature, from with good reason, explores what makes a person good. Professor Duncan Richter says taking an ethics course is not necessarily transformative, but it will teach how to think through all sides of an issue and determine what resonates with you. And Steven Emmanuel encourages his students to acknowledge points of disagreement and explore ways of working together to achieve common goals.
June 25, M	Bob King, author of the Astro Bob blog in the Duluth News-Tribune, is a regular guest on The Roadhouse, King recently wrote a new book, "Wonders of the Night Sky You Must See Before You Die: The Guide to Extraordinary Curiosities of Our Universe".
