### Issue – Unintended Consequences of Technology

In the early 1800s, author Mary Shelley wrote a cautionary tale of science gone wrong. Perhaps best known, by the public, via the 1931 black and white film version of “Frankenstein” the idea of unintended consequences was presented in striking detail. Unfortunately, fiction often only precedes reality rather than preventing it. Pastor John Bradshaw discusses the modern “Frankenstein” of the uncontrolled Internet that threatens the well-being of millions.

### Issue – What to Do About Alzheimer’s Disease?

Few diseases strike fear in the heart and mind as does Alzheimer’s. The slow disappearance of a person within their own body has great impact upon both the patient and their family. Currently considered “incurable” can anything be done to at least delay or possibly even avoid Alzheimer’s? Pastor John Bradshaw discusses this issue with Dr. Wes Youngberg, Lifestyle Medicine Specialist, Clinical Nutritionist and Assistant Clinical Professor at the Schools of Medicine and Public Health at Loma Linda University.

### Issue – The High Cost of Poor Fathering

Some fathers seem to be drawn right from 1950s television scripts. Always present when needed, attentive and understanding, protective, industrious and wise. Unfortunately, the reality is that some are less so, or even mediocre, at best. But, what about dads that are negligent, uncaring, abusive or even criminal! Host John Bradshaw analyzes who the perfect Father is and how you can know Him!
